

Bouygues Construction Australia has been awarded the contract to deliver the Culcairn Solar Farm for Neoen Australia.

"In conjunction with Bouygues Energies and Services Australia, Bouygues Construction Australia has been awarded the contract to deliver the Culcairn Solar Farm for Neoen Australia.

Located in the Riverina approximately 45km north of Albury, the Culcairn Solar Farm is a significant undertaking for our team. With a capacity of 440 MWp, it will be one of the largest solar farms in NSW covering a site of approximately 1,000 Hectares. The solar farm is expected to generate enough energy to power 160,000 homes and will also deliver a major boost to the regional economy through the creation of jobs and ongoing work for the local community.

This will be the ninth solar farm that we have delivered in Australia. The opportunity to work on the Culcairn Solar Farm reflects our strong credentials and expertise in the solar market - congratulations to the team for delivering these excellent outcomes for the solar business this year."
