EDF's goal is to maintain its position as the global, efficient, responsible electricity company that champions low-carbon growth. The world of energy is changing, and energy is becoming more decentralized, low-carbon and data-driven. Customers are increasingly engaged in their consumption, energy efficiency, and self-generation. Meters are becoming smarter. The bulk of EDF's new power comes from the wind, the sun and the sea, and we are seeking ways to utilize nature's resources as best possible to generate electricity and conduct business in a sustainable and responsible manner.
