

Bollore Australia's Commitment on Facility Security for its valued Stakeholders: TAPA FSR Level – A Certification ached.

Bollore Australia under its Security Policy continually strives to provide a secure environment with the use of appropriate technology and establishment & enforcement of procedures to protect its people, customer's products and properties within our business operations. Continuing this commitment and uncompromising efforts to achieve industry respected certification on Facility Security for its valued stakeholders, Bollore Australia accomplished **TAPA FSR 2020 Security Level – A Certification** for its Melbourne and Erskine Park (Sydney) warehouse & distribution facilities in November 2020.

Transported Asset Protection Association (TAPA) is a non-profit organization, uniting global manufacturers, logistics providers, freight carriers, law enforcement agencies, and other stakeholders with the common aim of reducing losses from international supply chains. Organizations who store and distribute high value goods can demonstrate to its stakeholders through TAPA Certification that they are continually improving and increasing supply chain security. A TAPA Certification aims to reduce the loss of goods in the transport chain. Internationally recognized TAPA FSR (Facility Security Requirements) Certification is designed for Warehouse Security to ensure safe & secure storage and warehousing of the goods. It represents minimum standards specifically for secure warehousing, or in-transit storage, within a supply chain. Facilities under TAPA FSR Certification Framework are classified under three security levels (Level C, Level B & Level A) based on the protection levels needed. TAPA FSR – A Certification is the highest certification level determined as Elevated Security Protection assessed by an Independent Assessment Body (IAB).

“Certification to TAPA FSR 2020 Level A is a further step to continually improve our Security Management System to protect our team members, customer’s products and properties within our business operations. We view this recognition as a competitive advantage and reinforce our commitment to our valued customers & other stakeholders that Bollore Australia is determined to run securely & effectively to reduce security related losses across high-value supply chain”.
