Please register by June 05, 2017. Contact person: Maryna Zenkova

Ukraine and Belarus are neighboring countries of Poland and all three enjoy a great common history.

Ukraine offers many business opportunities, with an excellent geographical location, visa-free entry for nationals of numerous world countries and a clear plan for modernization.

Belarus, being a member of the Eurasian Economic Union with good connections to Russia, also has a lot to offer. Today the country is the leader in legislation improvement that is confirmed by the World Bank's Doing Business 2016 survey.

How to approach these markets? What are the opportunities? In which sectors?

You will get the practical answers to these questions from experts with long-time experience in the CIS countries
