

1. BACKGROUND

Sasol Petroleum Temane (SPT) and its Petroleum Production Agreement Unincorporated Joint Venture (PPA UJV) partners operate the Central Processing Facility (CPF) located in the Inhambane province of Mozambique. The CPF processes natural gas, as acquired from the Pande, Temane and Inhassoro fields, for local consumption and export to neighbouring South Africa. The field gathering system for the Pande field consists of flowlines feeding from the wellheads to a field gathering manifold/central manifold, where the total product from the Pande field is combined and transported, via a single 30" Trunk Line to the CPF. The field gathering system for the Temane and Inhassoro fields consists of flowlines feeding from the wellheads directly to an inlet manifold at the CPF, to which the 30" Pande Trunk Line is also connected. Pipeline sizes range from 6" to 30" for a total combined length of approximately 200 km.

SPT has commissioned a Pipeline Inspection and Repair program (PIRP) to execute the inspection and repair requirements of the network of lines, as directed by the pipeline integrity management plan (IMP), until expected end of life of the fields (2034). The Pipeline Inspections and Repair program entails, amongst others, program planning and execution, data management, and the procurement and supervision of execution Contractors for in-service inspections (including, amongst others, specification and selection of fit-for-purpose and cost-effective in-line inspection technologies, fit-for-service assessments and remaining life determinations of lines) and repairs (i.e., development and specification of repair techniques and execution of a repair strategy and plan) by using, to the maximum extent possible, execution Contractors already providing services to Sasol's Satellite Operations, e.g., pigging and welding Contractors etc.

In support of the engineering, procurement and construction of the PIRP Project, amongst others, Sasol will be required to appoint construction Contractors to execute the various scopes of construction works.

2. CONSTRUCTION REQUIREMENTS

The PIRP project requires construction works commonly required for pipeline construction for oil, gas and petrochemical projects. Interested Contractors will need to prove their appropriate ability and experience to successfully execute construction works as described below in compliance with the technical requirements and criteria applicable to oil, gas and petrochemical projects in Mozambique whilst satisfying Mozambican local content requirements.

The required construction works are defined as the follows:

REFERENCE	CONSTRUCTION WORKS CATEGORIES
1327/100	<p>Civil and Mechanical Contractor: Repair of anomalies on 44,5km long 30" trunk line. Direct and Indirect assessment on 80m long 16" in-plant pipeline and conduct repairs of anomalies identified. Removal of coating and field coating where defect repairs are conducted. Installation of magnetic markers.</p> <p>Civil works includes excavations and exposing of sections of pipeline where defect repairs are required. Backfilling and reinstatement of area where excavations are done.</p> <p>Repair material, composite repair sleeves, bolted split sleeves, full encirclement sleeves, will be free issued to the Contractor.</p>

3. OBJECTIVE OF THIS EOI

This request is intended to solicit information required to enable Sasol to identify and assess suitably qualified and experienced Contractors registered or established and operating in the Republic of Mozambique, in order to create an opportunity for such Contractors to potentially participate in the future bidding for this project.

Sasol hereby invites eligible Contractors to indicate their interest to bid for specific Construction Works identified above. Interested Contractors should provide appropriate information showing that they have the required qualification(s), ability, expertise, skills, capacity and relevant experience to perform the Work.

Kindly refrain from submitting any irrelevant information and documentation. Kindly ensure that each item hereunder is addressed and that your submission is structured strictly in accordance with the list of required documentation and information hereunder:

1) Sasol has been over the years a driver of socio-economic development through its investments and operations. A key aspect of this development impact has been enabled through its commitment to Local Content. Sasol is fully committed to improved levels of local content and supports the local content requirements for the procurement of goods and services which are designed to promote the development of Mozambican owned businesses and know-how. The aim is to maximise procurement from Mozambique owned (majority and minority) and Inhambane Head Quartered companies. Accordingly, Sasol encourages interested Contractors to maximize any potential local participation when responding to this Request for EOI. Relative to Local Content, Contractors are to:

- Provide detail of the Contractor's ownership structure [percentage shareholding held by shareholders as well as a description of the identity of shareholders] and details of registration of the company in terms of Mozambican legislation.
 - Indicate what percentage of Mozambican labour, staff and management the Contractor envisages using to execute the Works.
 - Indicate what percentage of the Contractor's estimated cost would be based on Mozambican procured materials and services.
 - Contractor to indicate if the company is a Mozambican registered entity, a Mozambican minority owned entity or a Mozambican majority owned entity. Contractor to also indicate whether the company has Head Quarters in Inhambane.
- 2) Provide relevant financial information for last 3 years, current year and a forecast for next year. [Turnover, net profit and total equity reserves].
- 3) Technical capability
- Provide a detailed track record of work performed over the past 5 years specifically for the referenced category.
 - Provide details of work performed for Sasol in Mozambique over the last 5 years.
 - Provide full details of the following: Contractor's technical skills; equipment quality and capacity; resources' skills, qualifications, experience and capacity; planning systems / progress measuring system; and workshop capacity to proof that it can

successfully execute the Work applicable to the referenced category.

- Provide Information and detail of the Contractor's accredited quality, health, safety and environmental management systems as well as all applicable accreditations.
- Provide detail of the Contractor's knowledge and experience with the NEC (New Engineering Contract).
- Demonstrate ability to conduct business in the English Language.

Potential bidders will be selected in terms of Sasol's evaluation criteria [as determined by Sasol], taking into account the details that the Contractor supplies, all other information [including all risks associated with this project]. Potential bidders will be selected by Sasol in its sole and unfettered discretion.

Contractors who satisfy the pre-qualification criteria will be required to sign a confidentiality agreement with Sasol, prior to receiving any further information regarding the project and for the purpose of further commercial process.

4. SUBMISSION INSTRUCTIONS

Interested and eligible Contractors are to submit the information and documentation stipulated above (in English) as per the following:

E-mail address: pirp@vgiafrica.com
Description of Project: **PIRP Project**
Closing Date: **11 February 2022**
Closing time: **12:00 (UTC+02:00) Harare, Pretoria**

5. GENERAL

Interested and eligible Contractors should note that this request by Sasol is aimed solely at requesting information required by it to enable future decisions regarding the Construction Works and selection of potential construction bidders. It does not, in any manner, indicate any intention by Sasol to enter into further discussions with any Contractor who submits information and expresses interest to participate in this process, or to enter into any contract or other commercial relationship between Sasol and such Contractor, nor does it constitute an undertaking by Sasol to award any contracts to, or to place any purchase orders related thereto whatsoever on, any Contractor. Sasol is under no obligation to consider only the respondents to this EOI for potential future Contracts.

Responses by Sasol will only be made to short-listed prospective bidders and Sasol may request further information from such identified bidders. Sasol may also arrange for auditing of information that has been provided by a respondent pursuant to this EOI.
