

# SPORTS & EVENTS

# OUR VISION

---

**Sport is our everyday lives.** Or at least it should be. Events come and go, but they too are present, here and there. Sports and events make our lives healthier and happier.

**Our vision, and our efforts,** is to find synergies between these. How can sports and events be a positive catalyst in our lives and cities.

**Our goal** is to assist clubs, cities, nations realize their dreams. Our match is to create a balance between the “players” – engaging and satisfying the client group achieving their needs and wishes. Our championship is won when a lasting legacy is delivered.

# AT STAKE

---

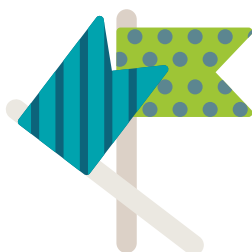

## Renovation or New construction

Assessing, auditing, benchmarking, advising...

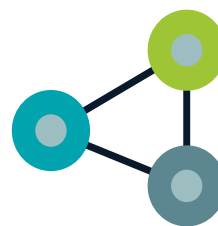

## Sustainability

Defining sustainability Low-carbon design  
Sustainable waste and resource management (water, energy, materials)  
Comfort, health and well-being for building users and visitors.

## Games and Legacy

Temporary vs Permanent.  
Using the event as catalyst for social, economic and urban development.

## Connectivity and smart stadium

Improving, stadium performance and operations and fan engagement.

# EGIS HAS “DELIVERED” IN STADIA

## WORLD WIDE MORE THAN **1 000 000 SEATS**

Under the spotlight : **Riviera Allianz, Nice Stadium**

**2 000 tons of CO<sup>2</sup>**

is being saved of 50 years by using a mix of wood and steel for the stadium structure.

**8 500 m<sup>2</sup>**

of photovoltaic panels allow for the stadium to produce more energy than it consumes.

**240 m<sup>3</sup>**

of water tanks allow for reuse of rain water to irrigate the pitch and other green areas.

**3 100 m<sup>3</sup>**

of glued laminated timber reducing loads and improving structural performance.

## OUR SPORTIVE PAST IN BRIEF

Egis has been active in the Sports and Events world for many years. Designing and advising for stadia, arenas, concert halls, theatres, conference and exhibition centres... Working by the sides of owners or as part of a consortium, Egis tackles projects starting with their earliest stages via a cross specialization process. Our extensive experience in designing sports complexes, backed by solid expertise acquired in related fields, such as cultural facilities, enables us to anticipate technical questions that go beyond the specific challenges of traditional sports arenas.

**Imagine a sustainable future,  
working for populations: this is our vocation.**

We are dedicated to meeting the planet's challenges and supporting the energy, ecology, digital and technical transitions, all to serve the common good. With its unique global offering, Egis combines the know-how of construction engineering and consulting with its skills in project development, operation and services.

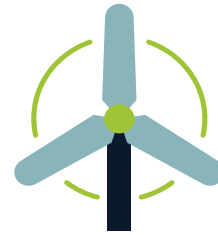

# WHAT WE BRING...

Our comprehensive understanding of our client's demands, the operations' requirements and the construction of a sports venue or an event allows us to better guide our clients throughout the whole lifecycle of their project:

## Design & Consultancy

- Architecture & Engineering
- Design Brief
- Complex structures, façade design, retractable roofs...
- BIM

## Sustainability

- Improve energy performance
- Reduce ecological footprint
- Saving and reusing waters (rain and used water)

## Communication and Marketing

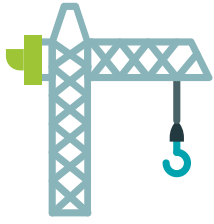

- Positioning strategy and influence
- Communication of: medias, corporate, building sites and crisis
- Digital
- Space design
- Events

## Telecoms & Systems engineering

- Telecoms : backbone, phone, radio, IPTV & medias, audio, ...
- Ticketing & Access
- Security control systems

## Construction management

- Planning and Program management
- Procurement strategy
- Budget control

## Financial & Cost Consultancy

- Estimating CAPEX and OPEX
- Modelling financial feasibilities
- Benchmarking

## Transportation and Mobility

- Demand forecast, modeling and planning
- Traffic and parking optimization.
- Aviation and air traffic control
- Public transportation
- Crowd flow assessment
- Signage & Wayfinding

## The Stadium and the City

- Master planning, Urban Design and Landscaping
- Approvals and planning permission
- Improving and creating synergies for socio-economic development
