## A project giving bus batteries a second life

- Batteries from route 55 buses are to be used for storing electricity from solar panels
- 130 apartments in a sustainable housing project run by Riksbyggen (Viva). Inauguration 2018.
- The batteries will have a storage capacity of 200 kWh
- Research project between Göteborg Energi, Riksbyggen, Volvo and Johanneberg Science Park

We need to travel into the future together!
