

# BUSINESS RESILIENCE

Porquê a Eurotux?

# INSTALAÇÕES

Eurotux has offices in Portugal (Braga, Lisbon and Bragança), United Kingdom (London) and since 2012 it has been represented in Mozambique by ITMZ: a company providing IT services in Africa.

ITMZ, 40% owned by a Mozambican shareholder, operates with its own team and specific skills appropriate to the market in which it operates, resorting whenever necessary, remotely or in person, to the resources made available by Eurotux.

# IT RISK MANAGEMENT

- IT Risk Management concerns the set of methods/processes adopted to achieve a balance between the risks and costs of operations.
- Organizational processes and routines are increasingly dependent on technological resources and tools.
- A well-done risk management allows for more assertive decision making.

— **IT security and risk management should be a part of any organization, regardless of its size.**

— **This presentation is not based on standards or frameworks and, without ignoring them, it is based on the practical aspect of the projects and services that ITMZ implements.**

**22 YEARS OF EXPERIENCE**

*CONTINUOUS AND ADAPTED INFRASTRUCTURE MANAGEMENT  
SERVICES THAT KEEP SERVICES SECURE AND RELIABLE.*
