Shelters for war victims in Ukraine

Every day, residents of eastern Ukraine experience the horror of shelling from the Russian military. In small villages most people have nowhere to hide from the hail of bullets, and their own home becomes a trap for them.

Foundation Unity and Strength from Ukraine, in cooperation with local authorities organizes shelters for civilians in case of shelling. They have started a project to build 108 shelters.

108 shelters for civilians are being organized by Unity&Strength Foundation in Kharkiv, Sumy and other regions. The project, named "Life Corner" is being implemented in the villages of Kucherivka, Synkivka, Podolia and other villages near the frontline. This is a region heavily affected by warfare. There is no electricity, gas or water there. Water is available only in places where there are wells.

Examples of shelters organized as part of the "Life Corner" project

Shelters for war victims in Ukraine

The shelters will be equipped with supplies necessary for the survival of the civilian population, including:

1. power generators,

2. electric chargers,

3. gasoline,

4. extension cords,

5. lamps,

6. long-term food,

7. cleaning and hygiene products

8. water,

9. medication,

10. gas cylinders and cookers,

11. instant soups and porridges,

12. fire extinguishers,

13. water filters,

14. blankets, sleeping bags, heating blankets

15. folding beds.

Thanks to the cooperation and trust built over the last 12 months, the Forum Foundation and the Chambers are working with a partner in the Netherlands, who proposed to send 52 generators with the capacity of 5.5 kW to the region, without receiving payment in advance.

The generators were transported from the Netherlands to Poland thanks to the generosity of Fracht FWO Poland and delivered to Kharkiv.

The Forum Foundation undertook to make every effort to cover the costs of the generators. The bilateral chambers of commerce intend to support the Forum Foundation in their efforts, hoping that the effect of joint actions will be covering the costs of generators and the purchase of additional equipment for shelters.

We invite you to join us and to support the project through donations and by spreading the news.
