

# HAROPA = LE HAVRE + ROUEN + PARIS PORTS

**June 2021:** Merge to one single State institution which **Stephane Raison** will take over as Director General.

Seine Valley **decarbonation** is part of the key elements of HAROPA Strategy for 2020/2025 and beyond. Combined **CCSU** and **H2** projects started in October 2020.

- Major industrial sites and local territorial organisations are part of the CCSU project.
- Implementation plan expected to be completed by June 2021 for all aspects of the CCSU.
- Same cooperation along the Seine Axis for H2 development including production, transport, distribution and usage for industry and mobility. First estimate of 8% CO2 reduction with H2 produced with low carbon or renewable energies.
- Looking for sharing Highlights and Lowlights for improving efficiency of our projects.
