

EDF Renewables and EDF International Division become EDF Power Solutions

17/06/2025

UAE, June 17, 2025 – EDF Renewables and the EDF Group International Division join forces into EDF Power Solutions, an entity intended to strengthen the efficiency and clarity of their international activities.

EDF Power Solutions, an entity of EDF Group, has a gross installed capacity of 31 GW globally in its low-carbon electricity generation portfolio in operation worldwide. It will rely on EDF's expertise and the technological, commercial and geographical synergies between the two entities to design innovative and efficient offers, combining several technologies and conceived as part of a global approach to ensure the decarbonisation and efficiency of local electricity systems.

With 10,000 employees in more than 25 countries, EDF Power Solutions offers a wide range of technologies for low-carbon electricity generation (wind, solar, hydropower, biomass), the flexibility of electricity systems (battery, pumped-storage hydropower, low-carbon thermal, hybrid solutions, etc.) and the reduction of its customers' carbon footprint (solar and C&I storage, mini-grids, electric mobility, hydrogen, etc.).

The company is committed to applying the best international health and safety standards and to integrating environmental and social factors into the design phase of its projects to control their impact throughout the operating life of assets.

In the Middle East region, the launch of EDF Power Solutions consolidates a multi-technology regional portfolio of 12 GWac of installed power capacity and over 13 million tonnes of CO₂ emissions to offset per annum. As a responsible and innovation-driven industry player the group aims to better serve the region's energy transition by offering comprehensive, low-carbon solutions across the entire energy value chain. It combines deep infrastructure know-how with cutting-edge renewable technologies – tailored to the region's needs, which is positioning it as the leading international developer in the Middle East.

With a highly qualified human capital, EDF Power Solutions Middle East is actively shaping the future of energy systems—providing cleaner, more resilient, and more efficient outcomes for its partners across the region.

Luc Koechlin, CEO of EDF Middle East, commented: *“EDF Power Solutions Middle East marks a new milestone in our journey in the region. We're building on a strong foundation of proven delivery, trusted partnerships, and deep local understanding. With 12 GWac of capacity in the region, we thrive on highly technical projects, where we can bring real value through our ability to respond to the scale and speed of the energy transition. This allows us to support governments and industries in meeting their most ambitious energy goals through customized high-performance energy solutions.”*

Dubai, UAE

EDF Power Solutions Middle East is aligned with strategic national objectives including the UAE Net Zero 2050 initiative, Saudi Arabia's Vision 2030, and Oman's green hydrogen roadmap. The company remains fully committed to our presence in the region and look forward to continuing our collaboration to power a sustainable energy future.

The new entity reflects EDF's global ambition to deploy 600 TWh of low-carbon production by 2035 and marks the Middle East as one of the fastest-growing regions in its international portfolio, making the new electric world possible for everyone everywhere.

Key figures of EDF Power Solutions in the Middle East:

- › 12 GWac of low-carbon projects
- › 13 million tons of CO2 to offset every year*
- › 1 million households powered with clean electricity per annum*
- › Presence in KSA, UAE, Oman, Bahrein, Qatar, Kuwait

-Ends-

About EDF Group

The EDF Group is a key player in the energy transition, as an integrated energy operator engaged in all aspects of the energy business: power generation, distribution, trading, energy sales and energy services. The Group is a world leader in low-carbon energy, with a low carbon output of 520TWh, a diverse generation mix based mainly on nuclear and renewable energy (including hydropower). It is also investing in new technologies to support the energy transition. EDF's raison d'être is to build a net zero energy future with electricity and innovative solutions and services, to help save the planet and drive well-being and economic development. The Group supplies energy and services to approximately 40.9 million customers and generated consolidated sales of €118.7 billion in 2024.
