Roland Bourgeois

prezident Francouzsko-české obchodní komory (Saint-Gobain) / President of the French-Czech chamber of commerce (Saint-Gobain)

Alexis Dutertre

velvyslanec Francie v České republice / Ambassador of France to the Czech Republic

9:15 - 10:30 **POLITICKÁ DEBATA:** Maximalizace přínosů jaderného průmyslu pro region a ekonomiku /
POLITICAL DEBATE: Maximising benefits from nuclear industry for region and economy

Alexandr Vondra

poslanec Evropského parlamentu / Member of the European Parliament

Frédéric Petit

poslanec francouzského Národního shromáždění za 7. volební obvod francouzských občanů usazených mimo Francii / Member of French National Assembly for the 7th constituency of the French residents overseas

Ladislav Havlíček

ředitel odboru rozvoje nových jaderných zdrojů Ministerstva průmyslu a obchodu ČR / Director of the Department for the development of the new nuclear units at Ministry of Industry and Trade

Alexis Dutertre

velvyslanec Francie v České republice / Ambassador of France to the Czech Republic

Martin Hýský

zastupitel kraje Vysočina / Representative of the Vysočina region

Olivier Bard

generální ředitel GIFEN / CEO of GIFEN

Jean-Philippe Ballaz

ředitel ekonomického rozvoje Nuclear Valley / Director of the economic development at Nuclear Valley

10:30 - 10:45 Přestávka / Coffee break

10:45 - 12:00 **KULATÝ STŮL Č. 1:** Maximalizace přínosů jaderného průmyslu pro region a ekonomiku /
ROUNDTABLE NR 1: Maximising benefits from nuclear industry for region and economy

Aleš Rod, výkonný ředitel společnosti CETA představí výstupy studie - výsledky dotazníku mezi místními podnikateli a stakeholders na Třebíčsku o jejich očekáváních od výstavby a odhadovaných ekonomických přínosech novostavby pro ekonomiku jako celek a region. /
Aleš Rod, executive director of CETA will present relevant outcomes of the study - results of questionnaire among local businesses and stakeholders in the Třebíč region on their expectations from the construction and estimated economic benefits of the newbuild on the economy as a whole and the region.

Roman Zdebor - EDF

ředitel pobočky / Branch Managing Director

Dušan Richtár - Czech Export Bank

ředitel odboru finančního obchodu a exportu / Director of Export Finance Department

Dauren Serkebayev - Framatome

odpovědný za nabídku Framatome ve výběrovém řízení na projekt Dukovany 5 / Responsible for Framatome's offer in the Dukovany 5 tender

SOCIO-ECONOMIC IMPACTS ASSOCIATED WITH THE CONSTRUCTION OF NEW NUCLEAR UNITS

International Engineering Fair, Brno, Czech Republic
11 October 2023

Objectives of the study

– What is our goal?

- Identify key benefits as well as potential risks.
- We pay particular attention to specific risks that may not be obvious at first glance.
- Quantify the macro-economic benefits of the construction.
- Identify and quantify microeconomic benefits.
- Highlight areas that can be developed within the region hand in hand with the construction.

– Methodology

- Own questionnaire survey among entrepreneurs in the Třebíč region
- Debate roundtables with key stakeholders
- Input-Output analysis (quantifying multiplier effects)

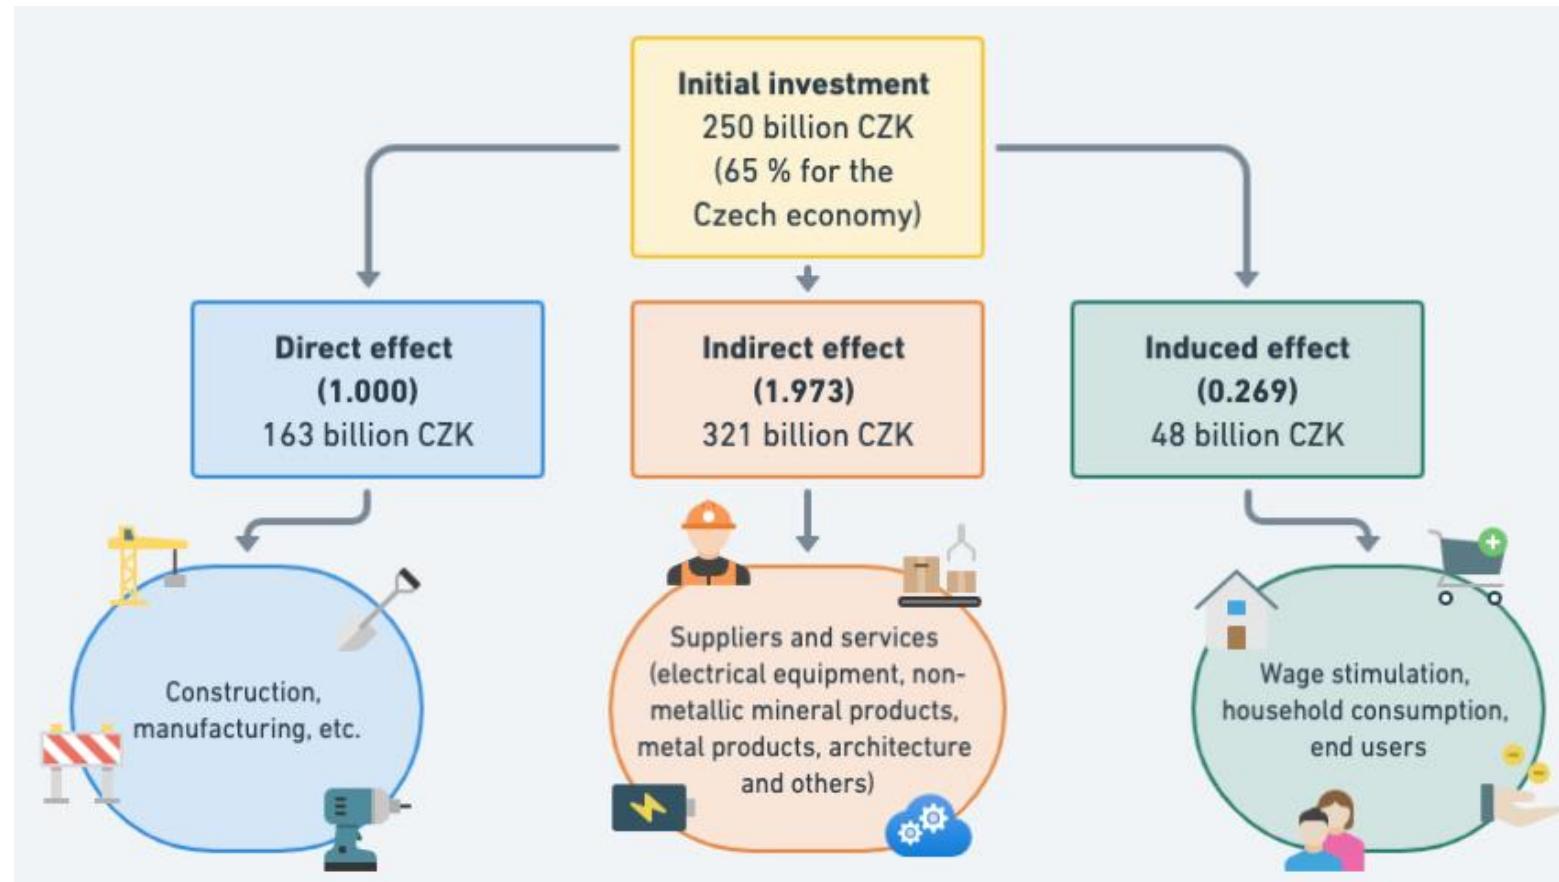

Macroeconomic impact of the investment (billion CZK)

	1 block	2 blocks	3 blocks	4 blocks
Investment (public estimate)	250 (10,2 billion EUR)	500 (20,5 billion EUR)	750 (30,7 billion EUR)	1.000 (41 billion EUR)
Of which for the Czech economy	65 %	65 %	65 %	65 %
Impact on GDP				
Direct	163	325	488	650
Indirect	321	641	962	1.282
Induced	48	96	144	192
SUM	532 (21,8 billion EUR)	1.062 (43,5 billion EUR)	1.594 (65,3 billion EUR)	2.124 (87,1 billion EUR)
Impact on governmnet budget	183 (7,5 billion EUR)	365 (14,9 billion EUR)	548 (22,5 billion EUR)	731 (29,9 billion EUR)

Source: own calculations based on publicly available information and CZSO statistical data

- The value-added multiplier is equal to 3.269.
 - Direct effect = 1.000
 - Indirect effect = 1.973
 - Induced effect = 0.269
- 65% involvement of the Czech industry (CPIA).
- The impact on the public budget has been estimated using a composite tax rate for the Czech Republic of 34.4% (OECD, 2020).
- The overall impact on the Czech economy will depend on the number of new units built.

Value-added multiplier effect of the construction

Source: own calculations based on publicly available information and CZSO statistical data

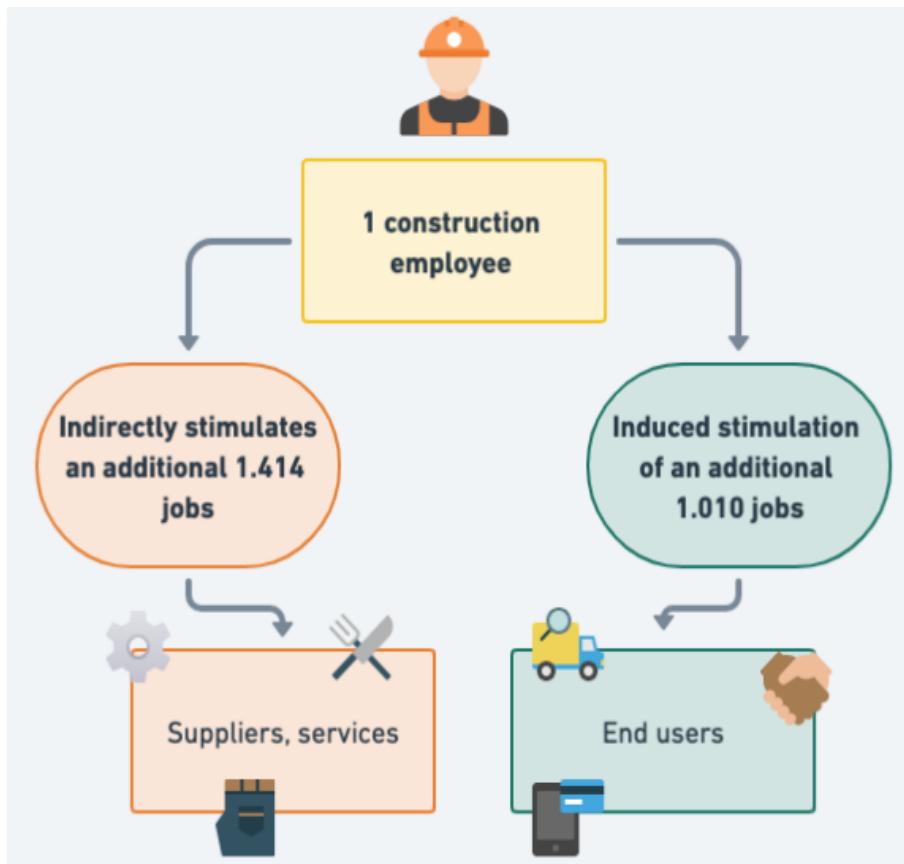

How many new jobs will the project create?

	1 block	2 blocks	3 blocks	4 blocks
Construction	up to 5.000	5.000–10.000	10.000–15.000	15.000–20.000
Operation	up to 1.000	1.000–2.000	2.000–3.000	až 4.000
<i>operation (20 %)</i>	200	200–400	400–600	600–800
<i>maitanance (30 %)</i>	300	300–600	600–900	900–1.200
<i>security (10 %)</i>	100	100-200	200–300	300–400
<i>indus safety (10 %)</i>	100	100-200	200–300	300-400
<i>support services (10 %)</i>	100	100–200	200–300	300–400
<i>ingeneering (5 %)</i>	50	50–100	100–150	150–200
<i>I&C (Instrumentation and control) (5 %)</i>	50	50–100	100–150	150–200
<i>excellence, chemistry, management (10 %)</i>	100	100–200	200–300	300–400

Source: own calculations based on publicly available information and EDF experience

- The operation of a power plant requires quite a wide range of different professions, from specialists to maintenance workers.
- More than half of the workforce provide day-to-day operations, security or maintenance.
- There are also those who provide operational safety, a range of support services, engineering, instrumentation or chemical processes.

Employment multiplier effect (construction works)

Source: own calculations based on publicly available information and CZSO statistical data

- The employment multiplier is equal to 3.4
 - o Direct effect = 1.000
 - o Indirect effect = 1.414
 - o Induced effect = 1.010
- However, these figures do not imply that 2.4 new jobs would be created with the employment of each additional construction worker.
- Employment within firms in the connected sectors will be positively stimulated, which may cause them to reach their capacity limits, and therefore new hires will be needed in the downstream sectors as well.

Potential benefits associated with the construction

The Dukovany nuclear power plant is perceived not only as a major employer, but also as a key contribution to the state energy security, a basis for increasing the educational level of the population, economic stability and the overall standard of living in the region.

Therefore, the construction of the new units is associated with a number of economic benefits and opportunities:

– Strengthening the Czech energy self-sufficiency.

- Building an alternative source of energy is absolutely essential for maintaining the competitiveness of the Czech economy in the future (cost increases for lignite power plants, pressure on energy prices).

– Strengthening transport as an opportunity to develop other infrastructure networks in the region.

- Digital, water and wastewater infrastructure, services, healthcare (telemedicine).

– Promoting education and stimulating human capital.

- Growth of human capital in the form of an inflow of skilled workers, quality of education and necessary retraining.

What are the key identified risks and gaps?

- Pressure on wage demands from employees of companies in the region and rising price levels.
- Increased demand for real estate and reduced housing affordability in the region.
- Insufficient transparent communication with all stakeholders.
- Timely adjustment of transport infrastructure.
- Shortage of building materials.
- Length of permitting processes and administrative complexity.
- Shortage of skilled labour force.

Conclusions and recommendations

- It is crucial to ensure that positive effects do not only stimulate overall Czech national economy, but also stimulate the host region itself in an appropriate and long-term manner, e.g. through the comprehensive and coordinated development of all infrastructure networks and services.
- Shortage of both manually skilled workers and nuclear power professionals could negatively affect development of the whole segment and closely related industries in the future.
 - International context -> number of other European countries are also planning massive investments in nuclear energy (competitive pressures).
 - The readiness of the labour market and training capacities must go hand in hand with the timing of the construction works and subsequent start-up of the new units.

A long-term coordination and strategic approach across all levels of government and municipalities is needed to overcome key barriers identified.

Thank you!

Ing. Aleš Rod, Ph.D.
executive director

NUCLEAR ENERGY AS AN OPPORTUNITY FOR REGIONAL DEVELOPMENT

Brno, 11/10/2023

5 minutes for safety

OUR GOLDEN RULES

ZERO ACCIDENT AMBITION

TOP KILLERS & VITAL RULES

I **NEVER** walk or stand under a suspended load.

I **ALWAYS** protect myself from falls from heights and I protect others from falling objects.

I **ALWAYS** maintain a safe distance from moving equipment.

I only work on equipment with all **energy sources locked out**.

I **ALWAYS** obtain a permit before entering a confined space.

First minutes dedicated to safety

Hold on to handrails

Reverse parking

Walking safety

Order and cleanliness

I **NEVER** work or drive under the influence of alcohol or drugs.

I **NEVER** use a mobile phone while driving.

I **ALWAYS** wear my seatbelt and respect traffic rules, including speed limits.

I **ALWAYS** use the specified protective equipment when performing live electrical work.

I **ALWAYS** wear a lifejacket when working near water where there is no guardrail.

A doubt, a danger... **STOP !**

If a rule is not applicable, we have a duty to stop and alert.
Any deviation requires a formalised risk analysis and written authorisation from management.

Framatome

For over 60 years, Framatome's teams have been involved in developing safe, competitive, clean, low-carbon nuclear energy worldwide by:

- designing nuclear power plants,
- supplying nuclear steam supply systems,
- designing and manufacturing components and fuel assemblies,
- integrating automation systems,
- and servicing all types of nuclear reactors.

The original equipment manufacturer of:

92 nuclear power plants

€4.1 billion revenue in 2022

framatome

MICHELE DELEVOYE - GE

**OBCHODNÍ ŘEDITELKA /
SENIOR COMMERCIAL MANAGER**

Integrated Offering

GE's Steam Power technology is operating in ...

50 % of the world's nuclear power plants

We provide leading technology for nuclear turbine islands from Equipment supply to Complete EPC INTEGRATED applications, Warranty, Lifetime Maintenance and Life extension services

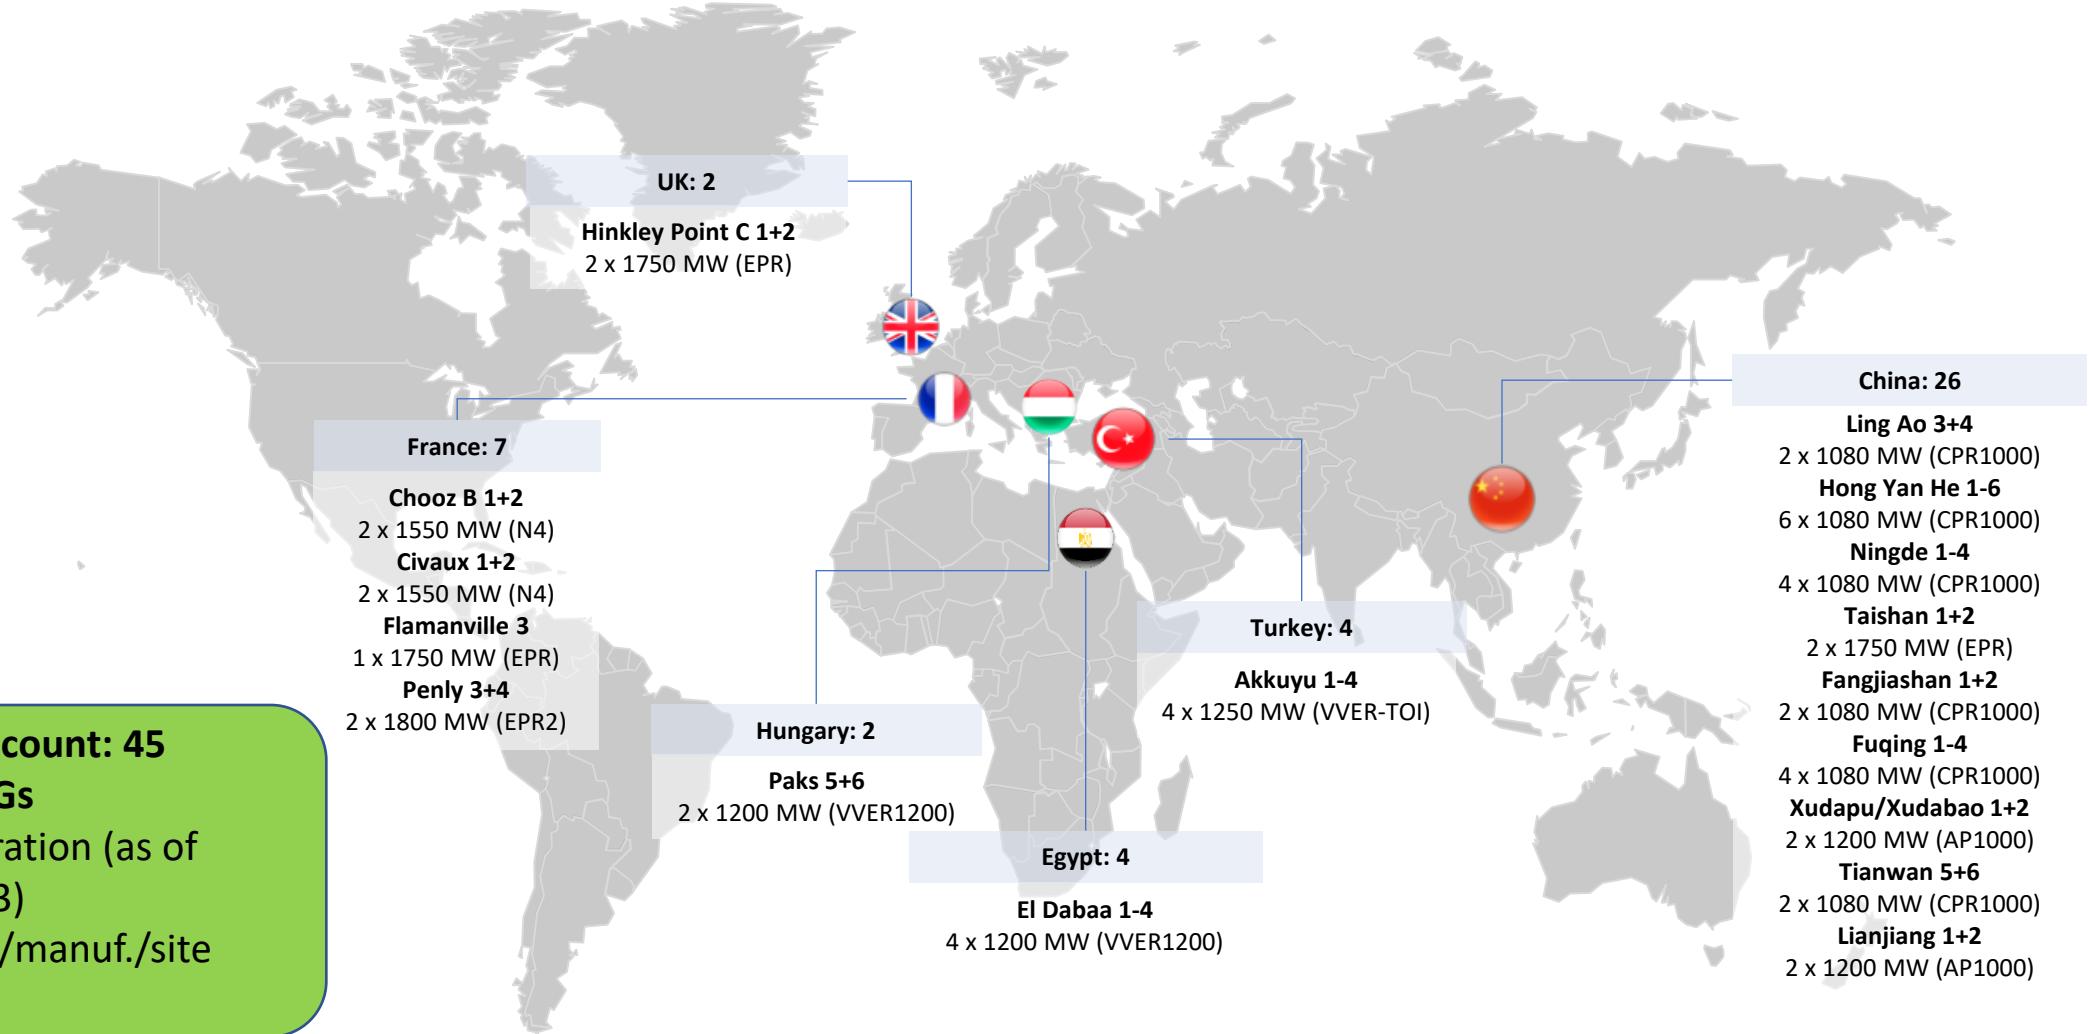

We regularly service ~200 units and execute more than 130 multi-year agreements (MYAs) with operators worldwide

GE's Steam Power Nuclear Business is :

- A team of ~ 3,400 employees across 16 countries

Arabelle Nuclear STG References

>20 years of Arabelle technology deployment worldwide on various reactor types

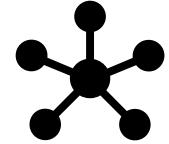

> 55 GW of Arabelle power worldwide

SUPPLIER QUALIFICATION PAVING THE WAY TO OTHER MARKETS

ISO 19443 - Nuclear Safety Pillar : Supply Chain Control

NOW, we are
EXECUTING...

“Fleet” Effect

FLA3

Taishan

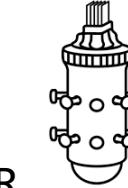

Hinkley Point C

...

THEN we can SUPPLY ...
thanks to a SUSTAINABLE
supply chain

SMR

Czech Republic

...

AREAS OF POTENTIAL LOCAL ENGAGEMENT & JOB CREATION

TO DATE : 13 CZECH Suppliers' Companies have been visited

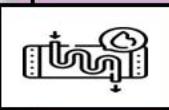

Two additional Memorandums of Cooperation for HX Scope signed in June 2023

Several Supplier development plans already under discussion

Networking events across Y2022 & Y2023

Potential for localization :

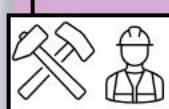

Heat Exchanger, Condenser (including LP heaters), MSR, HP & LP heaters and Feedwater tank.

Balance of Conventional Island,

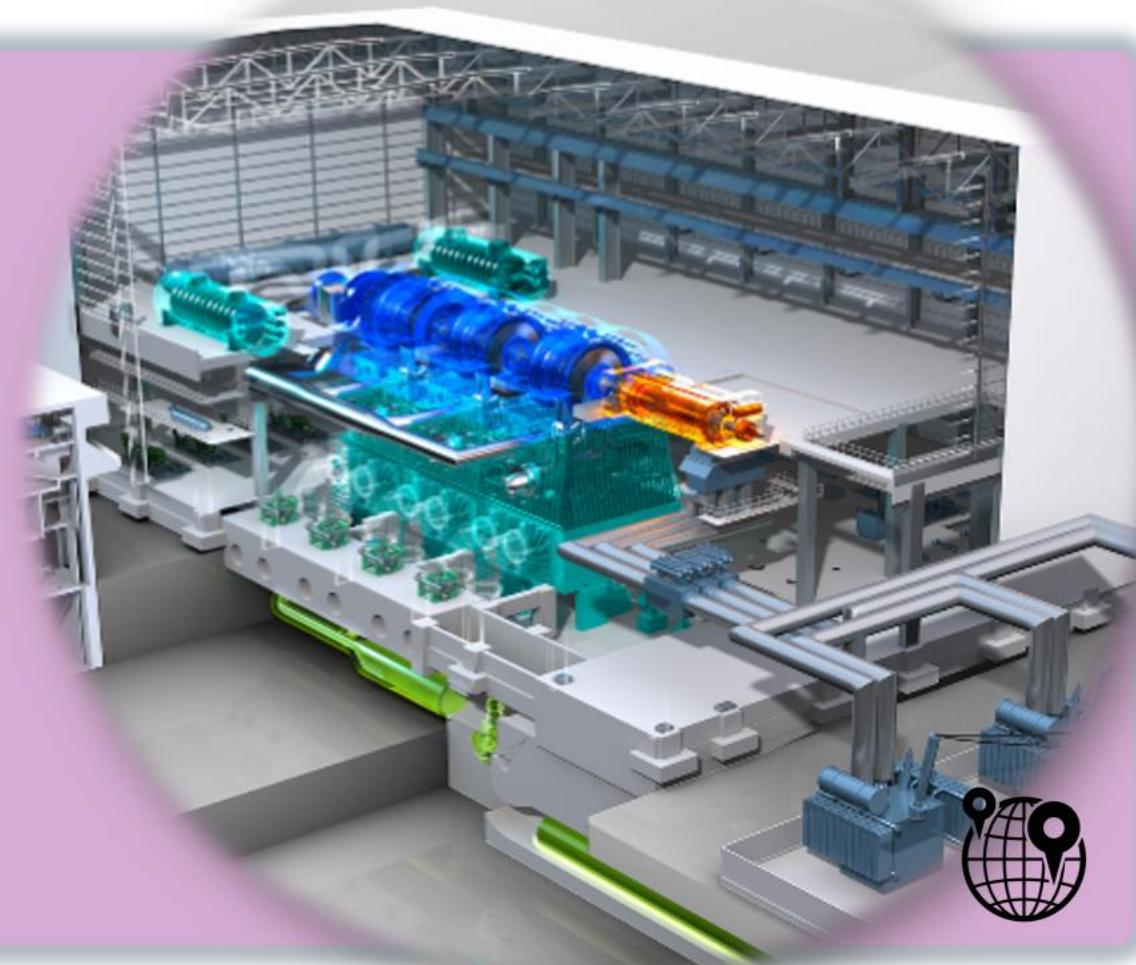

Generator connections, dosing system, polishing plant, fire extinguishing, gland system, valves, miscellaneous pumps, tank, piping and junction boxes

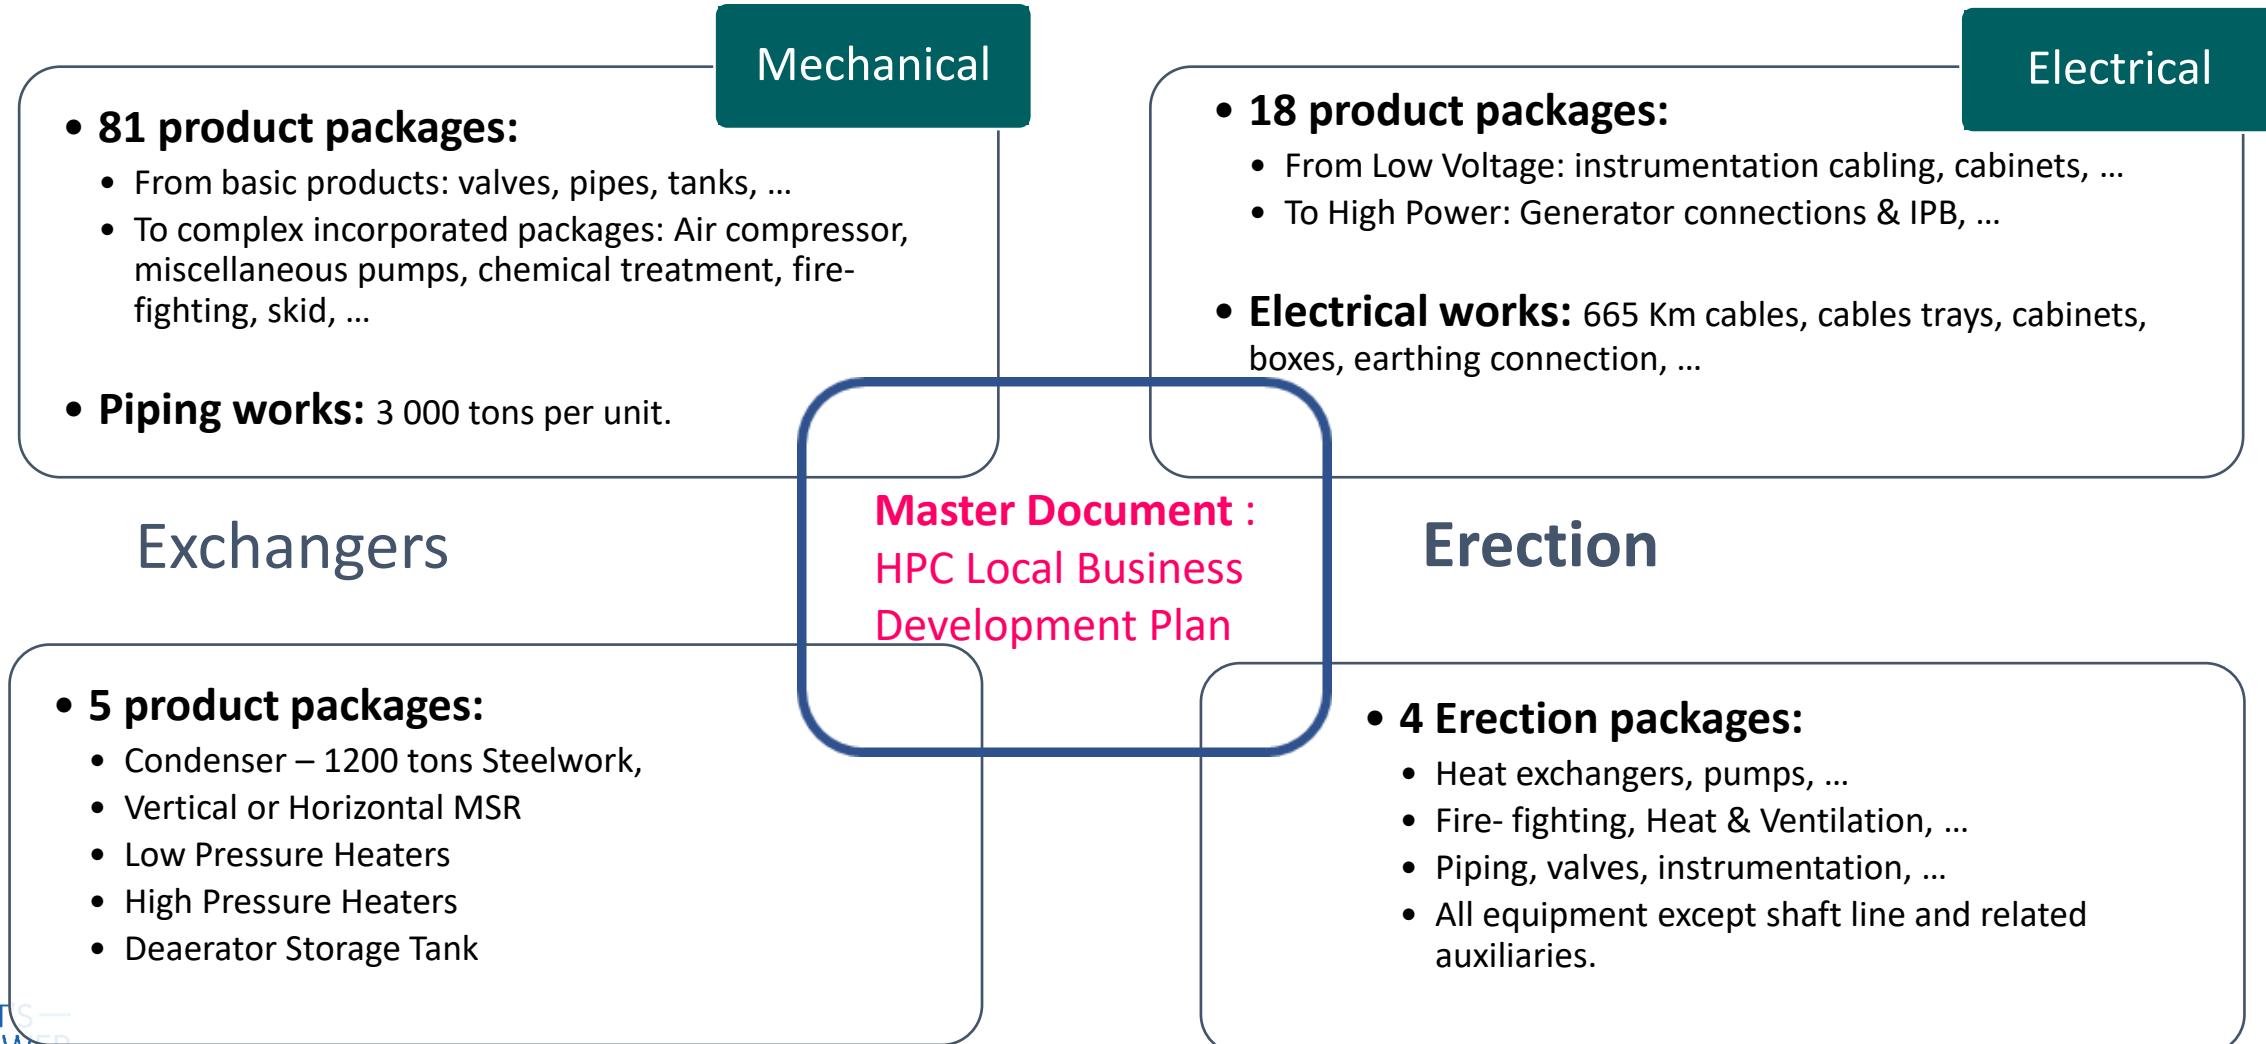

Site Erection & Services, Mechanical erection, piping erection, electrical and I&C works and secondary steel structure

BUT NOT ONLY... site management skills will also be needed, i.e. : Schedule manager, EHS manager, Quality manager, Nuclear Safety , Document management specialist , (...).

Lessons learnt from FLA3 / HPC : Comprehensive project management teams within local suppliers is crucial to the success of the project.

Localization Potential – EXAMPLE Hinkley Point C

Olympic gold medal won by Czech gymnast Bedřich Šupčík for rope climbing at the 1924 Summer Olympics in Paris on display in the National Museum (Národní muzeum) in Prague, Czech Republic

This medal was designed by French medal engraver André Rívaud

Economical Benefits from New NPP Units to be constructed in Czech Republic

cpiia czech power
industry alliance

ALLIANCE OF CZECH SUPPLIERS
FOR NUCLEAR POWER PLANTS

Czech Industry Capabilities

Potential economical benefits for the Czech Republic – 4 units and 65% of industry

Total project price	800 billion CZK
Czech Industry Participation	65 % → 520 billion CZK
Impact on Gross Domestic Product (interval)	260 – 936 billion CZK
Impact on public budgets income (interval)	107 – 384 billion CZK
Impact on public budgets outcome (interval)	110 – 396 billion CZK

Potential economical benefits for the Czech Republic – 4 units and 65% of industry

- Yearly in personal income taxes more than **1,5 billion CZK more than up to now** and in social a health insurance more than **6 billion CZK yearly more than up to now**
- **Maintenance opportunities during the new units operation life time cycle in amount of 120 billion CZK**
- **Tens of billions CZK yearly income** related with the following export activities performed by the industry

Potential strategy benefits for the Czech Republic – 4 units and 65% of industry

- To secure one of the most important industry brand we have in our country
- New units maintenance independency during the operation and independency when developing the related technology infrastructure
- Maintenance costs decreasing during the operation
- Overall education support – the future for the future generation

HPC Education Programmes – A Pipeline of Opportunity

INSPIRE

HPC Inspire

Ages: 11-16

HPC Inspire is our education programme for schools. Explore how subjects like science are relevant to the real world and open the door to a rewarding career, like engineering.

YOUNG HPC

Young HPC

Ages: 16-21

Young HPC is our skills and development programme for 16-21 year olds. It's a chance for you to get a foot in the door at HPC. Meet employers at exclusive events. And make yourself the best candidate possible.

Bridging the gap between education and work

JOBS SERVICE

HPC Jobs Service

Age: 18+

Register with the HPC Jobs Service to be the first to hear about jobs you're interested in. To talk to us about what you might be good at. And to identify the skills you need to follow a career you're interested in.

Hinkley Point C's Educational Programmes

Launched in 2010

- Aimed at those aged 16 & below
- Workshops, Mock Interviews, Careers Fairs
- Digital resources inc. Virtual Work Experience Programme
- Support over 40 schools across the South West

30
Events in
2022

Launched in 2016

- For those aged 16 – 21
- Fast track programme: exclusive events, careers workshops & fairs, curriculum insight talks
- Support 25 schools and colleges across the South West.

73
Events in
2022

2023 So far.....Education Outreach

3x Inspire workshops delivered by Stem Works
and our **Virtual Work Experience Programme** which will launch in October 2023

25x other events for those aged 14-16
Including: SomerScience & Cheltenham Science Fest

49x YHPC age range targeted events
Including: Yeovil College Construction Expo & Weston College Careers Fair

77x events in total since January 2023
Including: 70x face to face events and 7x virtual events

28x different event locations have been covered
including: 10x Schools, 10x Colleges and 3x Universities
(others are mixture of virtual and events with multiple locations not related to educational settings)

Over 20,000 young people engaged
with the Education Outreach Team since 2021

30x Young HPC posts created for social media
Including Pathway cut downs, 'Day in the Life' style videos and targeted apprenticeship ads

Further Training and Skills Development

- Hinkley Point C proves that the transition to net-zero can also deliver huge social and economic benefits, changing lives and communities for the better.
- New training centres will offer 30,000 places as we reach peak construction. The project will help them to upgrade their skills to get better jobs, better pay which in turns supports regional productivity.

Skills investment

£24 million invested directly into Education, Skills and Employment

Training

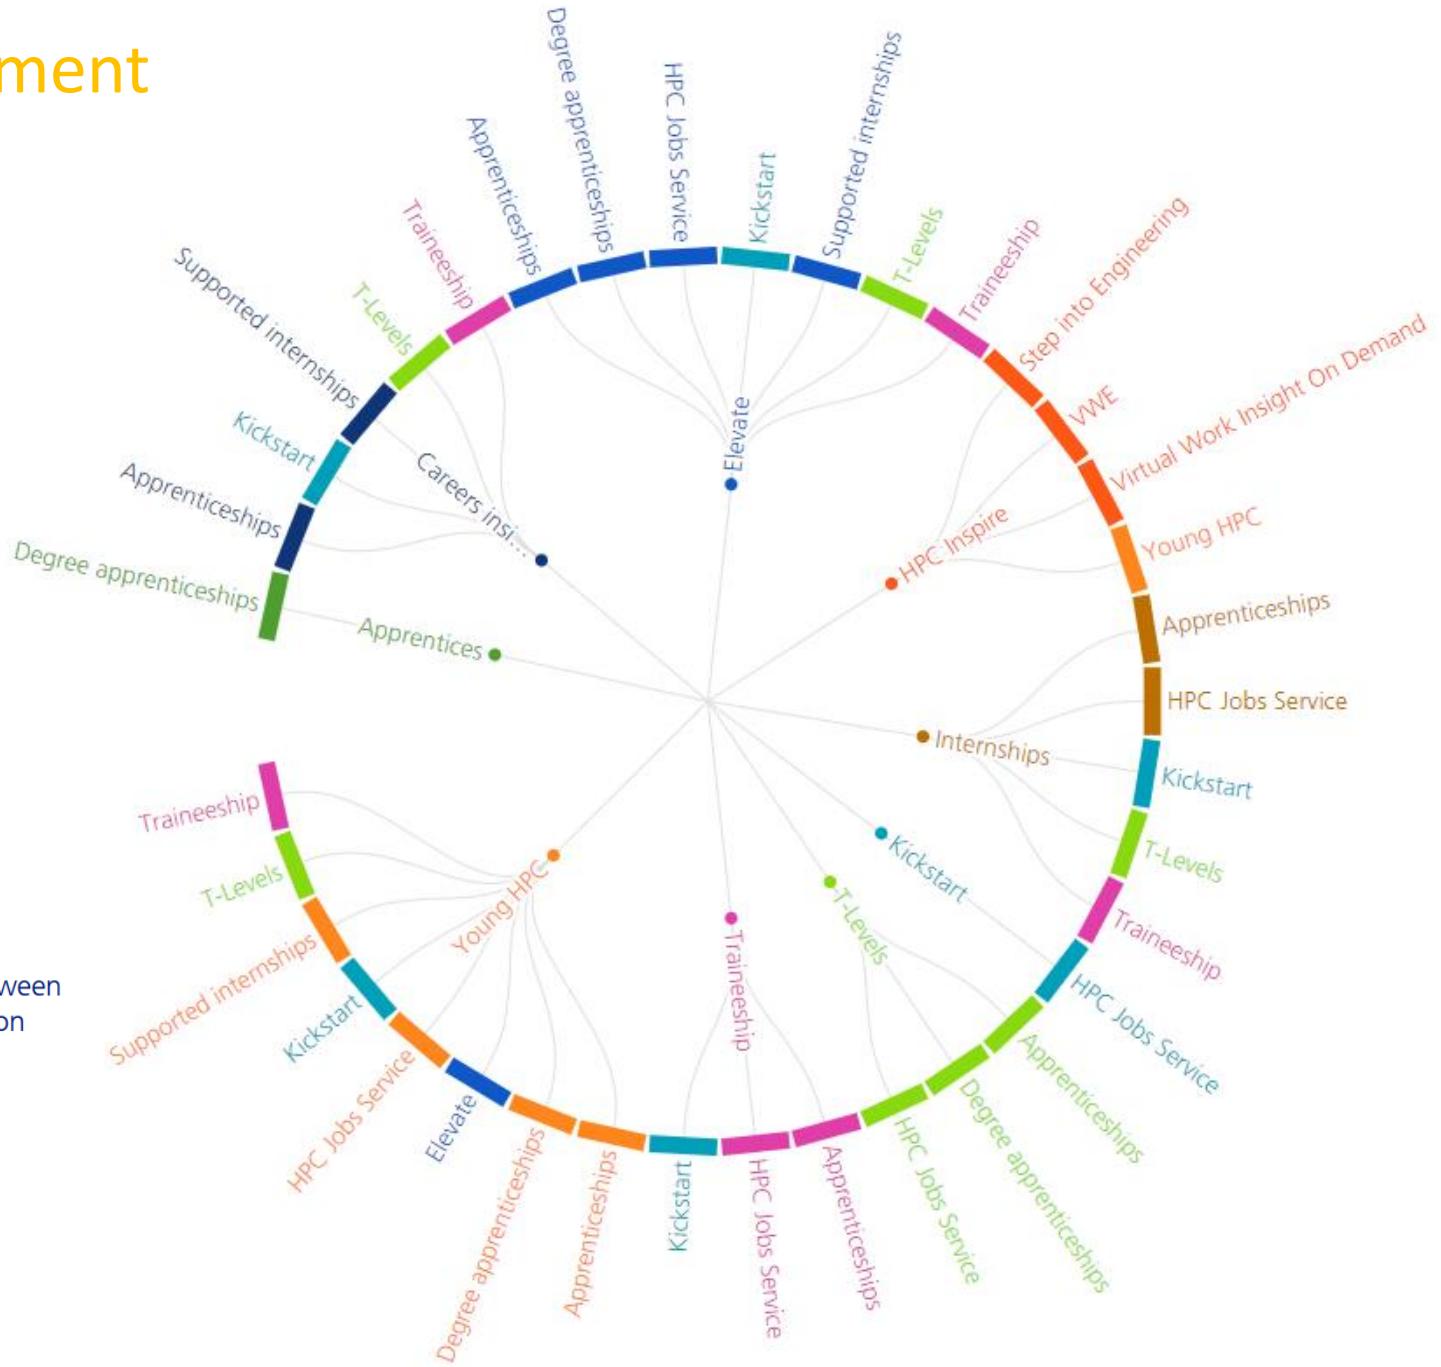

30,000 training places available between now and Hinkley Point C's completion

Apprentices

1,131 apprentices have been trained at Hinkley Point C so far

Original target: 1,000

Supporting Skills for Net-zero

Welding Centre of Excellence

Trainees are learning the specialised techniques required for nuclear projects. Since opening in 2020, more than 500 welders have been trained and tested, ensuring they have reached Hinkley Point C's competency standards. The Centre also provides routes for those seeking employment in welding, through the government's bootcamp training scheme.

Electrical Centre of Excellence

The facility, based at the Somerset Energy Innovation Centre in Bridgwater, provides training to support the electrical fit-out of Hinkley Point C. It also hosts candidates from the Hinkley Support Operative programme, which works to up-skill local people seeking employment and looking to begin new careers in construction.

Mechanical Centre of Excellence

Due to open later in 2022 and located next to the Construction Skills and Innovation Centre in Bridgwater, the facility will feature simulations of the Hinkley Point C site. Students will be trained and tested in mechanical installation techniques including pipefitting, steel erection and plating, ensuring they meet the high standards required for nuclear projects.

Diverse Training Routes

Hinkley support operative programme

Industrial placements

Reactor operator programme

Centres of Excellence

Occupational traineeships

Apprenticeships

Young HPC

Hinkley jobs service

Work experience

T-levels

Graduate programmes

Supported traineeships

SARAH ILLUZ - EDF

**VEDOUCÍ NABÍDKY EDF DUKOVANY 5 /
HEAD OF EDF'S DUKOVANY 5 OFFER**

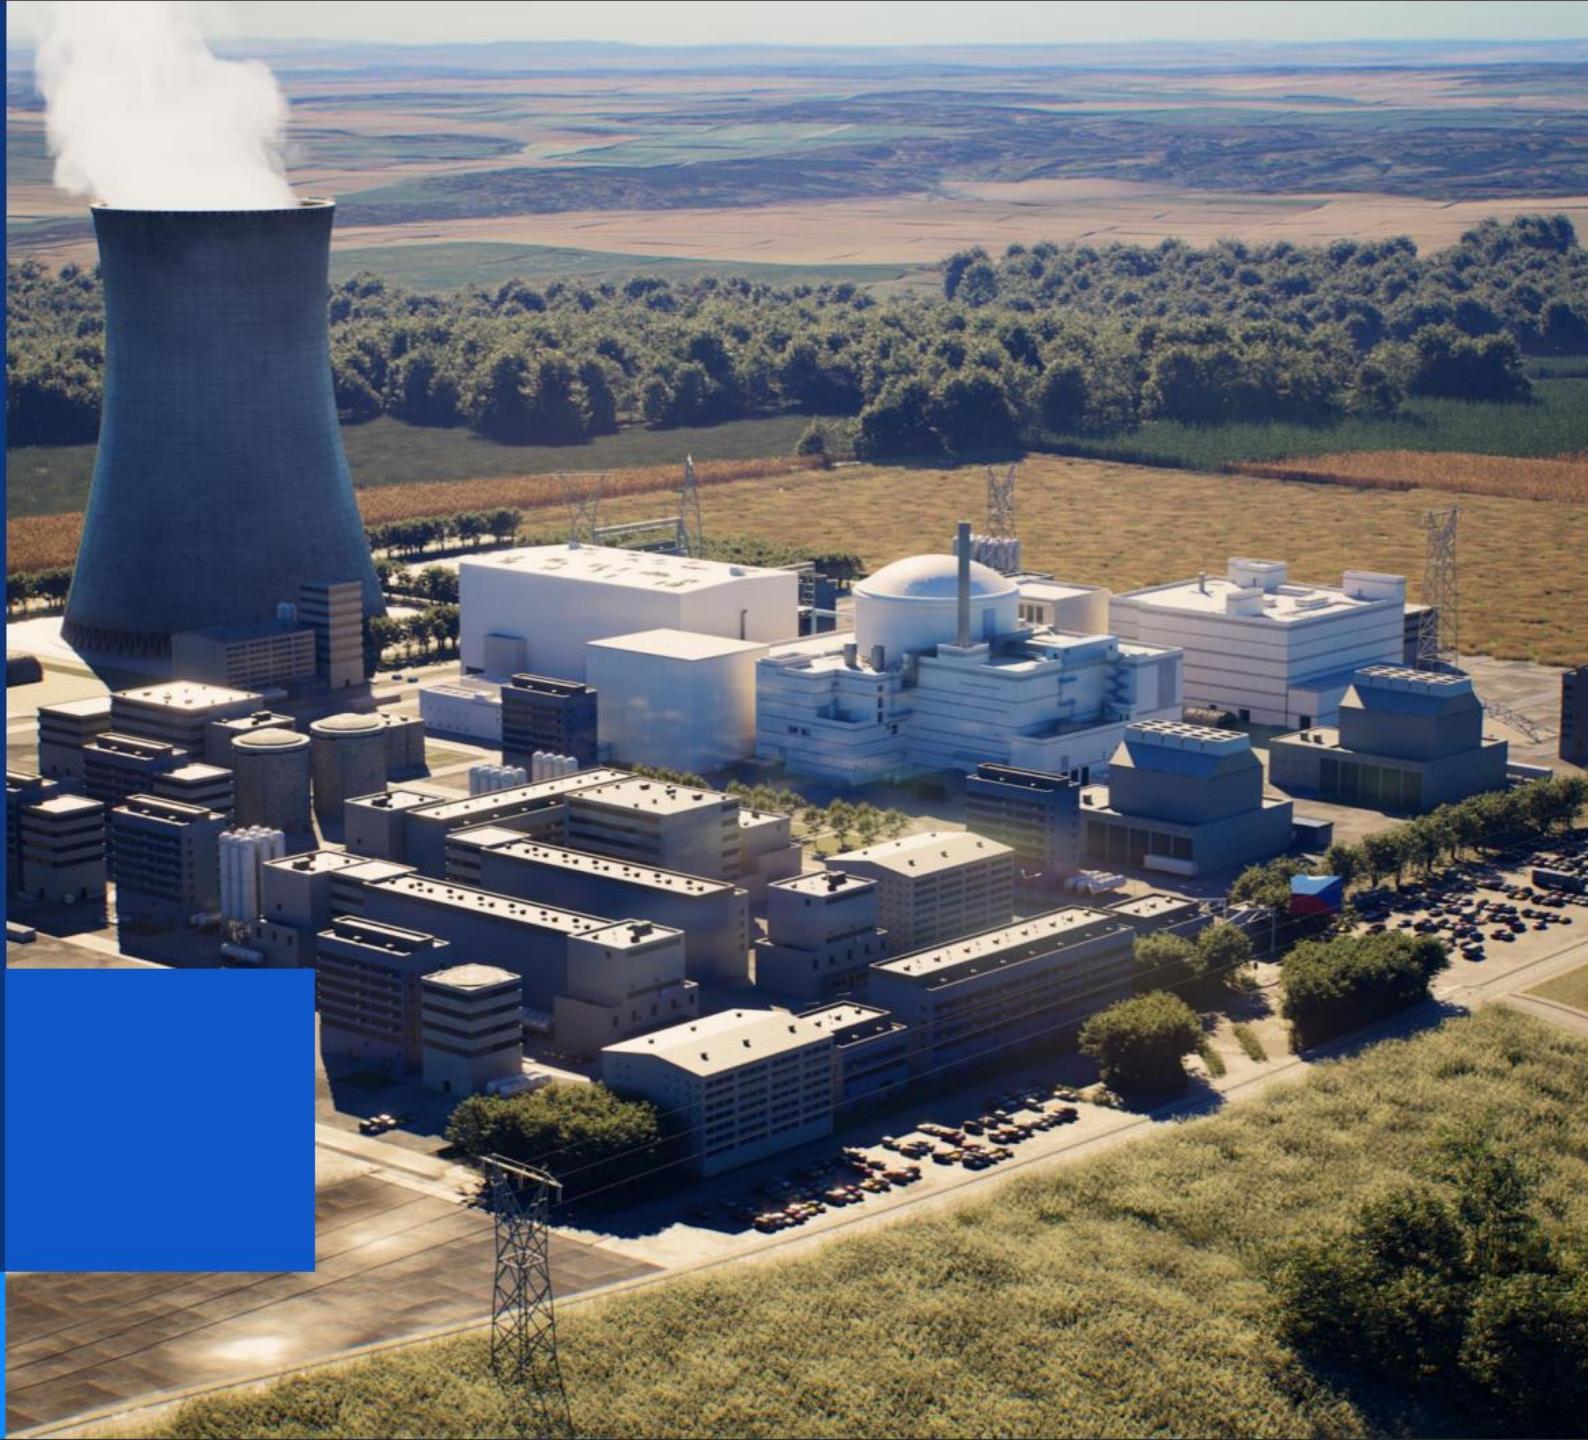

ROUNDTABLE 2

Sustainable labour force for Czech and European nuclear programme

Sarah ILLOUZ

EDF Offer Director for Dukovany 5

11.10.23 Brno

The Nuclear Renaissance in Europe and in the Czech Republic will come with a growing need of skilled resources by 2040

- EDF is already engaged in **strengthening its resources** to support its domestic programme and its pipeline of projects, especially in Europe with the **Dukovany 5 Project**
- EDF and its partners (Framatome, GE, Bouygues Travaux publics) are preparing the future with **numerous initiatives to increase their capabilities** at the EU level
- Supporting **Human Capacity Building** and **Localisation** is in our DNA !
- But it comes with **significant investment** on the side both of the vendor and the partner country
- No labour force can be adequately secured without **anticipation** and **forward-looking strategy**

A full scope approach to EPR1200 localisation for Dukovany 5 and beyond based on proven experience

- Localisation and skills development based on **practical experience** in various countries and more recently in the UK (**HPC EPR Project**)
- Sustainable and targeted **localisation programme** for a high level of local content on all levels of the value chain, supporting labor force development
- Advanced and proven **human capacity building** approach involving staff training, and supplier qualification
- Promotion of **long-term French-Czech cross industry partnerships** and not just a “subcontracting” approach
- Promoting social engagement and transparent **stakeholder management** practices through the Czech nuclear industry organisations and clusters

Building bridges between Czech and French Industries

+ 40
years

forging a localisation
methodology that
guarantees economic and
industrial benefits for local
communities

EDF's multi-level localisation strategy
will be implemented for DUKOVANY 5
with in mind the future Czech nuclear
fleet as well as in Temelín 3 & 4 and
for Dukovany 6

Unlocking Maximal Value and long-term engagement with Czech Industry

Relying on the experienced Czech nuclear industry

- Promotion of partnerships between Czech companies and experienced EDF suppliers, each company bringing its knowledge and experience to the partnership:
 - Czech regulation and working conditions by the Czech companies,
 - EPR specificities and EDF working process by EDF suppliers

Czech companies already successful partners in EPR projects

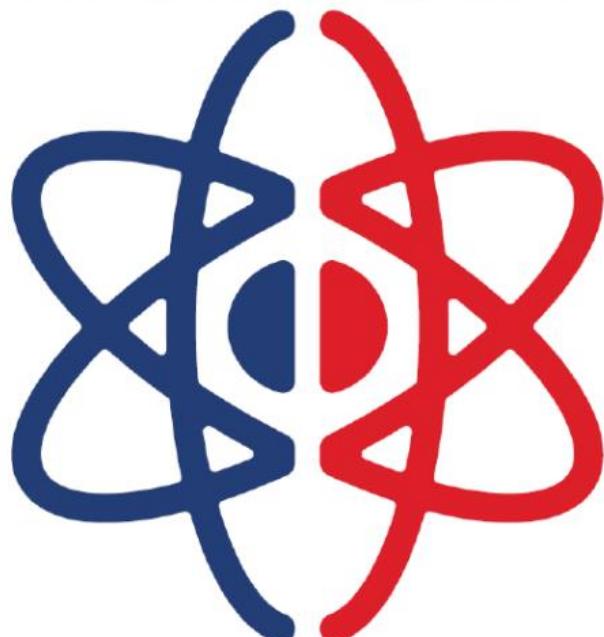

Implementation of robust localisation plans for all our projects

- Networking and creating opportunities : Suppliers Day
- Converging on shared values and commitments : Partners Day
- Human capacity building and training : Supplier Academy
- Fostering synergies of cooperation between Czech Industry and EDF partners
- Preparing the suppliers for success : company assessment, RFQ exercises, technical specifications

A Czech-French Nuclear Academy to secure the right skills at the right time

- The initiative will facilitate cooperation between both our countries providing a **comprehensive educational platform** at the level of universities, secondary schools and research institutions
- It will also focus on **vocational training and qualification**, with the already existing process of Supply chain qualification process
- Many actions are underway with **Czech universities** and **Suppliers' Academies**.

PETER SZENASY - EPDOR

**ZAKLADATEL A GENERÁLNÍ ŘEDITEL /
FOUNDER AND MANAGING DIRECTOR**

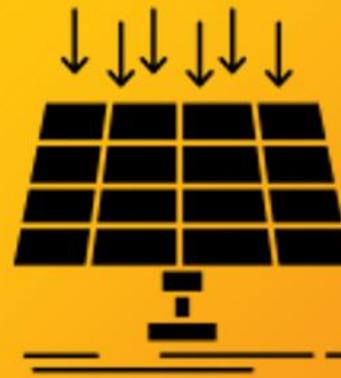

Sustainable labor force for Czech and European nuclear programme

October 11th,
2023

+

○

●

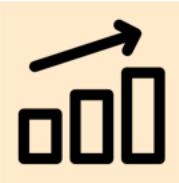

Addressing the task of establishing a sustainable workforce for the Czech and European nuclear program is highly intricate.

- Nuclear energy is notably more complex than renewable (solar and wind) energy.
- The forthcoming nuclear projects are poised to exert significant pressure on available resources.
- Challenges in the Czech market are already being grappled with.

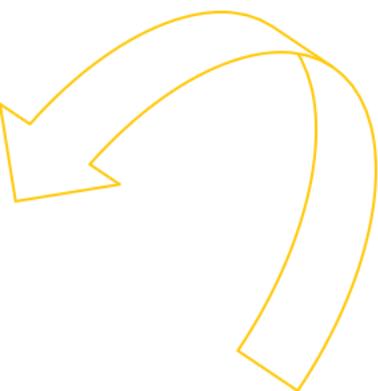

② Main issues

European language barrier and norms

Constantly evolving digitalization and artificial intelligence

3 Proposed solution

- A prominent concern** is the language barrier, highlighting the importance of discussing the standardization of norms to make English a primary working language.
- Standardizing norms and establishing projects in English** would effectively remove language obstacles and enable seamless collaboration among nuclear experts on European projects.
- Recognizing the pivotal role of digitalization and artificial intelligence** in tackling labor capacity challenges.

Way forward

- Increased investments in engineering qualifications across all generations and expertise.**
- Addressing this issue involves fostering the transition of employees from other industries and establishing a robust pipeline of new engineers from universities.**

Final words

Past successes in the nuclear sector in the Czech Republic give us confidence in our ability to overcome future challenges.

Sustainable labor force for Czech and European nuclear programme

CHALLENGES FOR OUR REGION

Aleš Dokulil, NUVIA Czech Republic

Supporting your energy

NUVIA CZ

- Established: 1995
- In VINCI group: since 2012
- HQ: Trebic, Czech Republic
- Turnover 2022: 28,5 mil. EUR

- Industrial automation
- Fire protection
- Ionizing radiation measurements
- Radiation monitoring systems
- Radioactive waste sorting and characterisation
- Scaffolding

PEOPLE

Current situation

Czech Republic

- NUVIA CZ
 - › 300 employees
- CEZ
 - › 22 700 employees
 - › 2 900 in nuclear
- Vinci Construction
 - › 4 200 employees in CZ

France

- NUVIA Group
 - › 1 400 employees (2 600 worldwide)
 - › 40 % in services
 - › 60 % in product development, engineering, training
- EDF
 - › 170 000 employees

CHALLENGES

Challenges of workforce sustainability in the nuclear industry

- Aging of existing employees
 - › CEZ Group – one third of employees between 50 – 59 years old
 - › 10 % of employees older than 60
- Competition
 - › With other industries
 - › With other new build projects (Poland, Hungary...)
 - › With other companies
 - 70 % of companies in Třebíč region are afraid of reducing labor availability and higher wage demands
- Education and training
 - › Nuclear
 - Very specific studiing programme
 - Perception of industry as "dirty"
 - Dead-end for careers

SOLUTIONS

Ways to deal with these challenges

- Atractivity
 - › Support for field of studies
 - › Support for region atractivity
 - › New technologies – digitization, automation
- Government
 - › Train nuclear workers, boost innovation
- Cooperation
 - › With educational and development institutions
 - › Between current and new employees, transfer of know-how
 - › Between companies?

Thank you Merci

FRANTIŠEK KURAL - ZAT

MARKETINGOVÝ A OBCHODNÍ ŘEDITEL /
MARKETING AND COMMERCIAL DIRECTOR

ZAT a.s. - readiness for deliveries for nuclear power generation

www.zat.cz

Introduction of ZAT

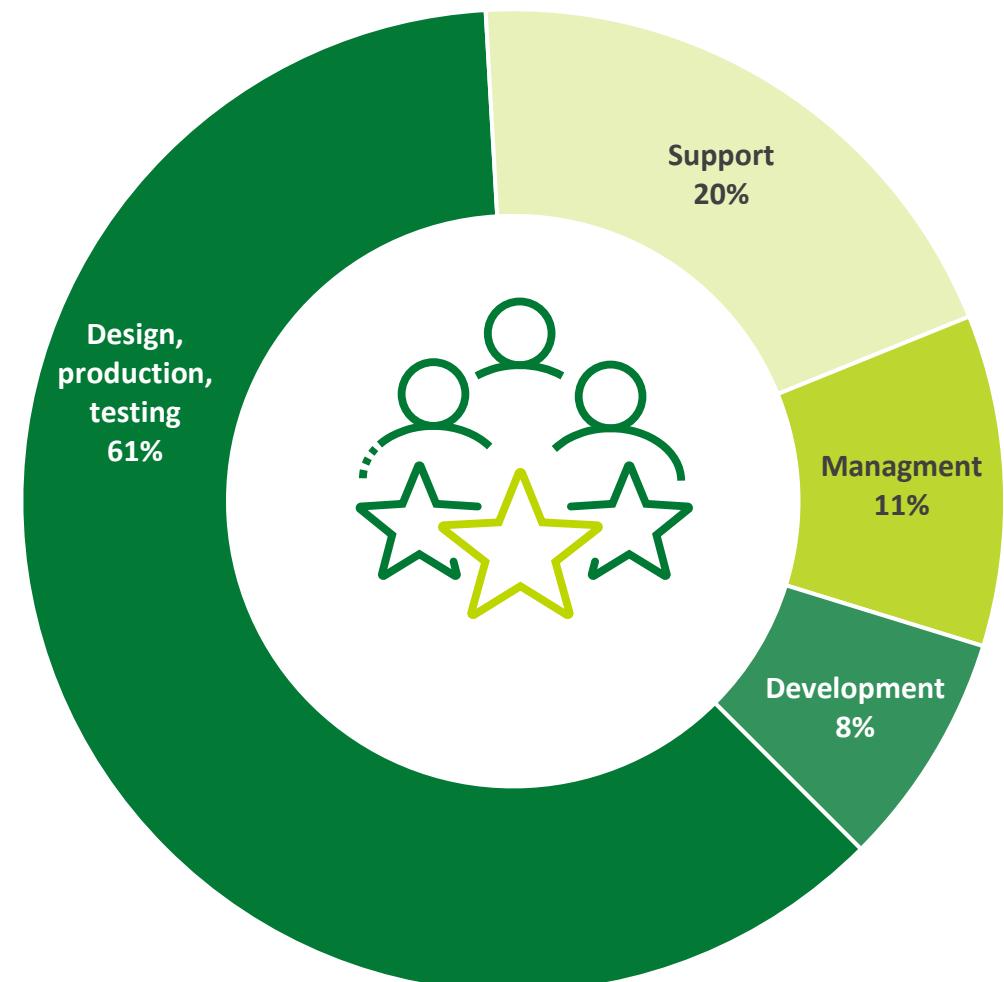

100% **Czech company** with a tradition

60 years of experience in industrial automation

Wide range of competencies of **340 employees**

I&C systems for **demanding fields** of industry

Experience, quality & reliability

Broad nuclear experience

47 years of supplies to nuclear power plants

Licensed with **8 state nuclear safety authorities**

Deliveries of I&C for **37 nuclear units**

Total value of approx. **240 mil USD**
(approx. 188 mil USD in operation/
approx. 52 mil USD in production)

In USD at exchange rate: USD 1 = CZK 24

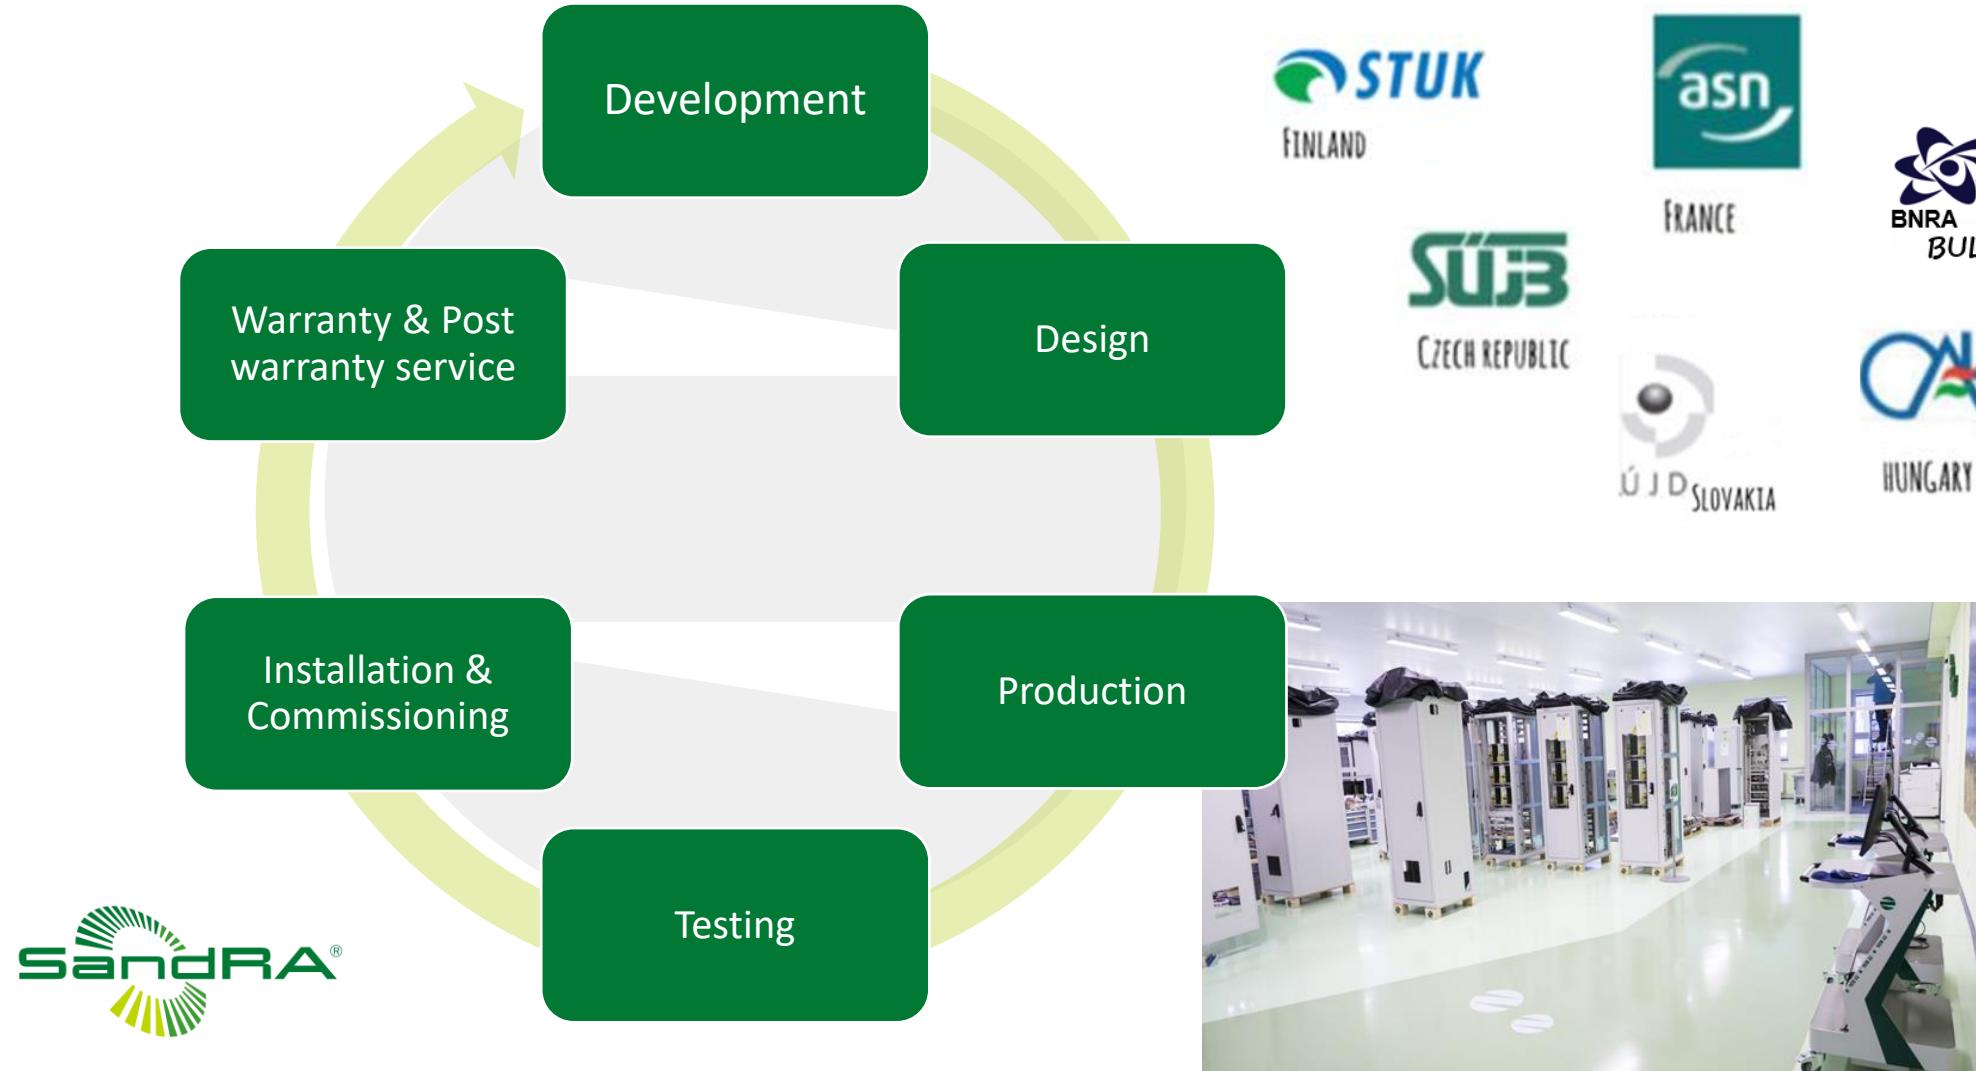

Solutions for nuclear power plants

- Based on the use of the **SandRA** platform
- **Complex supplies** from design to guaranteed service
- Portfolio of solutions for:
 - **Primary** part
 - **Secondary** part
 - **BoP**
- Know-how and experience from VVER projects used to provide **tailored solutions for various technologies**

ZAT as a provider of complex supplies of I&C systems
