

## Expertise. Innovation. Impact.

Our goal at SE Advisory Services is to help you develop and implement clear and practical plans that accelerate your most ambitious goals. Whether you're aiming to be more sustainable or resilient, bring innovation to life, or reduce your operational costs, we can help. Our market-leading expertise, intelligent software, and global implementation support will take you from ambition to impact.

### Innovative solutions, measurable results

#### Sustainable Business Transformation

Evolve your business for sustainable, resilient growth

Reinvention starts with a plan in motion. We partner with you to identify emerging strategies and implement them throughout your company and supply chain in ways that are realistic, measurable, and financially sound.

#### Risk Management & Resilience

Deliver excellence, no matter the disruption

Uncertainty is inevitable, but downtime doesn't have to be. We help you navigate climate risk, energy volatility, cyber threats, and system failures.

With proven strategies and clear data, your business will stay protected and prepared.

#### Resource & Asset Performance

Optimize resources for smarter, leaner operations

Make the most of your resources and assets. We identify inefficiencies, cut unnecessary costs, and boost business continuity. With our strategic evaluation of your resources and assets, you'll gain more reliable operations and the financial flexibility to grow.

### Our Approach

Our unique advisory model aligns strategy, technology, and implementation from step one for better and faster results.

#### Strategic Advisory

We translate complexity into clarity, combining global expertise and governance insight to deliver clear, actionable strategies across your entire enterprise and supply chain.

#### Intelligent Technology

Powered by AI and deep domain expertise, we co-create solutions with clients to enhance performance, mitigate risk, and build long-term resilience.

#### Seamless Implementation

Our end-to-end delivery model ensures seamless execution—from planning to transformation—accelerating outcomes across energy, sustainability, and digital operations.

## Intelligent Technology

We've developed a next-generation sustainability and energy platform with embedded advisory capabilities. It flags errors, spots trends, runs scenarios, and delivers proactive, actionable recommendations across sustainability, energy management, climate risk, and supply chain engagement.

Designed by experts in sustainability, energy, and industrial automation, our digital tools help you streamline operations and make fast, informed decisions.

### Advisory capabilities
