

SAFETY SKILL TRACK

IMPROVE YOUR ORGANIZATION'S EFFICIENCY

*Align your staff's skills with your
organizational goals.*

SAFETY SKILL TRACK Presentation

An organization's growth plans and performance depend on **trained and skilled employees**. Safety Skill Track helps organizations assess their talent and **design tailored training programs** to achieve operational excellence.

This tool is designed for companies that want **to assess their HSE skills in order to develop skills management plans** tailored to their specific needs, whether they are accelerated development projects lasting a few days or intensive programs lasting several weeks, months, or years.

With Safety Skill Track, you will be able **to identify, assess, and analyze gaps** between expected key skills and those that are not covered or are insufficiently covered within the company. It is therefore an **essential strategic tool for proactive management**, enabling you not only to meet market requirements but also to anticipate future trends.

The main challenge of internal skills assessment lies in its ability to accurately **map the company's human capital**.

This in-depth review of the skills within your organization will play a pivotal role in its ability to innovate, grow, and ultimately remain competitive.

You will also be able **to develop targeted training strategies**, optimize the allocation of your resources, and better align talent with your strategic objectives.

IN SUMMARY

Internal skills assessment is a strategic approach that enables you to:

- Initiate a **process of prevention and promotion** of health and safety at work by improving the skills of your teams
- Take a **strategic approach** to skills development
- **Optimize the operational management** of resources, jobs, and careers

THE QUESTIONNAIRE

The Safety Skill Track questionnaire can be **customized by job profile and/or industry**. Through a variety of questions (multiple choice, fill-in-the-blank, ranking, video scenarios, etc.), it allows you to **define skill levels or proficiency levels**.

With over **30 years of expertise** gained worldwide and lessons learned from research conducted by the ILO, we offer **innovative learning** that combines technical fundamentals and industry best practices, providing **the most reliable solutions for development plans**.
