Powering the Future

Integrating Energy, Infrastructure & Innovation for the Next Energy Ecosystem

CCIFG Energy Forum 2026 · 2nd Edition

Tuesday 29 September 2026 · The Lighthouse, Stavros Niarchos Foundation Cultural Center, Athens

Thank you for considering a partnership with the CCIFG Energy Forum 2026. Your support brings together the organisations and decision-makers shaping the future of energy across France, Greece and Europe — and places your company at the very centre of that conversation.

THE FORUM

Now in its second edition, the CCIFG Energy Forum looks beyond individual technologies to what truly drives competitiveness today: the ability to integrate generation, infrastructure, intelligence and innovation into resilient energy ecosystems. Through four strategic discussions and a ministerial fireside chat, it connects policy, technology, investment and innovation in one coherent narrative — showcasing French industrial expertise alongside Greece's growing role as a regional energy hub.

1 **Designing the Next Energy Ecosystem** — Policy, Security & Strategic Investment

2 **Integrating Tomorrow's Infrastructure** — Generation, Networks & Storage as One System

3 **Making Energy Intelligent** — AI, Smart Cities & the New Energy Consumer

4 **Innovation as Infrastructure** — From Research to Scalable Solutions

WHO WILL BE IN THE ROOM

The Forum is designed to convene senior decision-makers from both countries: the Greek and French energy ministries and European institutions; regulators and transmission system operators; leading French and Greek industrial groups across energy, infrastructure and engineering; investors and financiers; and technology innovators, French Tech and start-ups — with the involvement of the French Embassy, Business France and French Tech. An audience of CEOs, policymakers, investors and innovators.

AN EXCEPTIONAL VENUE — THE LIGHTHOUSE

The Forum will be held at the Lighthouse ("Pharos"), the glass-encased space crowning the Stavros Niarchos Foundation Cultural Center — the highest vantage point of Renzo Piano's landmark complex, an exclusive donation of the Stavros Niarchos Foundation to the Greek state. Wrapped entirely in glass, it offers sweeping panoramic views over Athens, Piraeus and the Saronic Gulf, with a direct line of sight to the Acropolis.

Fittingly for an energy forum, the building is sheltered by the "Magic Carpet," a 2.5-acre energy-producing solar canopy, and the SNFCC is among the first public buildings of its scale in Europe to earn LEED Platinum certification — a venue that embodies the very themes the Forum explores.
