THE ENERGY YEAR MOZAMBIQUE 2027

Why Mozambique in 2027

Mozambique is one of Africa's most consequential energy stories. With Area 4 and Coral South already producing LNG and Area 1 and Coral North advancing, the country is moving from discovery to delivery.

Beyond gas, hydropower, renewables, mining and logistics are expanding, widening the field for international partners and investors. The 2027 edition brings together ministers, regulators, national champions and international operators to map where the opportunities are and who is driving them.
