UAE FRANCE ENERGY FORUM

Powering Tomorrow Together

in partnership with

UNITED ARAB EMIRATES
MINISTRY OF ENERGY & INFRASTRUCTURE

CCI FRANCE UAE is a private organization under local law, and represents a community of more than 550 members, from SMEs and multinationals.

With more than fifty years of experience in the UAE, CCI FRANCE UAE's main missions are to:

- Strengthen and promote Franco-Emirates relations, through its privileged relationships with local governmental entities.
- Support French-based companies in their set-up and business development in the UAE,
- Animate French and Francophile companies by offering networking opportunities, sectorial and functional events with high added value.
- Promote member companies within the business community in the UAE.

CCI FRANCE UAE is member of the CCI France International network which includes 125 chambers in 98 countries. Our entity represents today the largest French, Francophone and Francophile business community in the Middle East.

UAE France Energy Forum

Powering Tomorrow Together

Following the high-level delegation led by the UAE Ministry of Energy and Infrastructure (MoEI) to Paris in May 2025, CCI France UAE facilitates execution-phase exchanges.

The UAE France Energy Forum Powering Tomorrow Together co-organised by Ministry of Energy and Infrastructure (MoEI) and CCI France UAE is designed to reflect the evolving realities of the global energy sector while reinforcing the complementary strengths of the UAE and France.

The structure follows a deliberate progression from technology and infrastructure to resilience, industrial transformation, and investment realities.

The agenda also reflects key strategic priorities identified during preparatory discussions:

- the growing importance of energy storage and grid resilience,
- the evolving role of nuclear energy,
- the continued centrality of oil & gas,

and the need to approach the transition through a pragmatic and industrial lens rather than an ideological one.

Leading player for the ME energy transition

Technip Energies' Abu Dhabi Operating Center is strategically situated to serve the evolving energy needs of the Middle East. With over 40 years of continuous local presence, it is the region's oldest international organization offering a comprehensive suite of services. The center leverages strong partnerships with key regional players, ensuring innovative, sustainable, and cost-effective solutions. Its proven track record includes successfully delivering projects, reinforcing its leadership and commitment to the energy industry in the region.

Proven Excellence in Project Delivery

Technip Energies Abu Dhabi has a strong track record of successfully delivering **over 1,000 projects** across all project phases, including Conceptual Studies, FEED, EPCM, and large-scale EPC initiatives.

Its extensive expertise spans both onshore and offshore domains, consistently providing innovative solutions, high-quality equipment, and reliable project execution, reinforcing its reputation as a trusted partner.

Cultivating Sustainability

Beyond the technical achievements, Technip Energies Abu Dhabi demonstrates a strong commitment to social responsibility through extensive humanitarian initiatives, completing over 2500 volunteering hours that have positively impacted over 5,400 lives in the community.

OFFICIAL INDUSTRIAL SERVICES PARTNER

Apave is an international group specialised in risk management, with more than 150 years of experience and 18,500 employees worldwide. In the Middle East, Apave supports clients across the UAE and the wider region on regulatory and non-regulatory risk management assignments, helping industrial, energy, infrastructure and construction operators keep their people, assets and environment safe.

Our expertise spans five core areas. We inspect the reliability of facilities and the compliance of industrial sites, infrastructure, buildings, equipment and processes. We test and measure to protect people and ensure equipment reliability. We train teams to build lasting safety skills. We support certification and labelling that helps organisations demonstrate their commitments. And we provide consulting and technical support to improve health and safety, protect the environment, and optimise facility and equipment performance.

Whether the challenge is safety, compliance or environmental protection, our role is the same: to act as a trusted third party our clients can rely on at every stage of a project's life.

Across the region, Apave Middle East works alongside Apave Lonestar, its UAE-based testing and measurement specialist, to deliver this expertise close to where our clients operate.

Our purpose: Acting as a trusted partner to make the world safer, more sustainable, and a source of shared progress.

TotalEnergies

TotalEnergies is a global integrated energy company that produces and markets energies (oil and biofuels, natural gas, biogas and low-carbon hydrogen, renewables and electricity) and is staying the course of its transition strategy.

Company description

Air Liquide, a global leader in gases, technologies and services for Industry and Health, operates in 73 countries, employs around 67,100 people, and serves over 3.9 million customers and patients. The company is present all across the GCC, actively contributing to the industrial gases sector for industries and is actively supporting local businesses in their decarbonization journey.

Our Know-how & added value

Air Liquide's scientific territory is focused on oxygen, nitrogen and hydrogen, which are essential molecules for life, matter and energy, and have been at the heart of the company's activities since 1902. The Group is committed to developing solutions that support the climate and energy transition, with a focus on low carbon hydrogen production and carbon capture, while also making advancements in healthcare, digital and high technologies.
