ADVOCACY IN ACTION

Where the voice of Franco-British business is heard.

Advocacy is how the Chamber ensures the voice of Franco-British business is heard where it matters most: in government, in the media, and at the highest levels of bilateral dialogue. It means working with our members to influence the policies, regulations, and decisions that shape your business operating environment.

From clean energy to AI, trade to mobility, the Chamber champions business priorities on both sides of the Channel so you can focus on growth, investment, and innovation.

WHY IT MATTERS

1. Faster decisions. Smarter regulation. Better outcomes.

Our advocacy work helps create the conditions for success, whether that means improving mobility for skilled talent, unlocking investment, or shaping future regulation.

2. Direct influence on government thinking.

The Chamber is a trusted voice with both UK and French governments. We co-chair the UK-France Business Forum, feed directly into planning ahead of intergovernmental summits, and submit evidence to policymakers on your behalf.

3. Advance warning of what's coming next.

We give members insights into the political and regulatory horizon, helping you plan for change, manage risk, and seize opportunity.

Our advocacy is practical, evidence-based, and high impact.
