

DANSK-FRANSK HANDELSKAMMER  
CHAMBRE DE COMMERCE FRANCO-DANOISE

# Innovation and Production Committee

Danish-French Chamber of Commerce

## Purpose of the committee

The Chamber has several leading engineering and production companies in our network. With our Innovation and Production committee, we arrange visits to their sites and present best-in-class production plants and interesting building projects.

The primary purpose of the committee is to act as a source of inspiration for members on the latest trends in Industry 4.0. In addition, members can expand their network, exchange experiences, and enrich their professional practice on internally selected themes related to innovation in industrial production.

## Working themes

- Visit of Production Facilities (including major production projects in Denmark)
- Carbon footprint reduction and energy efficiency
- Industry 4.0 with Digital Twin, Machine Learning, robots and other innovation
- Digitalization (eg digital performance boards, e-Quality Management System, Building Management System, etc.)

## Frequency

3-4 times a year

## Participants

- The committee is made up of companies in engineering, production, supply chain etc., primarily represented by Danish CEOs and production executives, as well as engineers or researchers from private-public organisations.
- In case of extra seats, other interested participants from the network may join.

## Working language

English.
