

20 years: Past, Present and Future Renewed to Serve Energy Efficiency

Cothec Kft., a member of  Group, has had a 20-year history in the Hungarian energy services market. The past few years have brought many changes, challenges, and continuous improvements. During this period the company has become a positive role model for corporate commitment in business. Cothec would like to thank our partners and clients for their cooperation, trust and support.

Thanks to the eco-friendly energy-based energy services provided by Cothec Kft., more than 200 municipal and state-owned buildings and nearly 80 residential buildings have been renovated in 20 years. Through its activities, 15,000 tons of annual CO2 reduction (equivalent to the annual emission of approximately 5,000 family homes) has been achieved, which proves the company's environmentally conscious thinking. Bearing the beneficial impact of centralized heat production on the environment in mind, since 2009 onwards more than 2000 consumers have been supplied with district heating services in 4 cities and district heat generation for 2 cities.

Over the past two decades, the company has mapped the energy consumption habits of many of its customers as an energy auditor, and contributed to the introduction of cost-effective energy savings options. As a specialized company providing technical-based energy solutions, with its tailor-made financing options Cothec Kft. made it possible to design, build or renovate old energy-saving equipment for heating, cooling, steam or compressed air, lighting, heat recovery with long-term operation joined with full-scale guarantees. The company's major references include the refurbishment and energy-efficient operation of Hajós Alfréd Swimming Pool, Opel Factory, Petz Aladár County Hospital in Győr and the Eastern Railway Station. During this time Cothec Kft. has been granted with numerous awards. The company is proud of its success, which has praised its fruitful business cooperation with the customers, furthermore the employees' devotion, assertive attitude and commitment.

In the year 2019, the company is reborn with the old experience behind and continues to strive for effective cooperation with its partners and customers in a new form, assisted by further professional colleagues on the "board". Cofely Kft. owned by  Group, mainly providing building engineering installations and managing the operation and maintenance of energy systems, merges with Cothec Ltd. in 2019. This summer **ENGIE Magyarország Kft.** is set up to combine the strengths of the companies from the value chain of Cothec and Cofely. This way a professional company is established that can offer complex and environmentally friendly energy solutions. The new company will be able to perform services starting from the implementation of the project idea ranging from design, installation, financing to operation, maintenance and full-scale energy supply.

 is one of the world's leading energy companies employing 153,000 people in 70 countries and thousands of companies and millions of families are considered to be among their satisfied customers. Cothec Ltd. is proud to join the  family, and confident that their mutual future success will continue as **ENGIE Magyarország** as well.
