

Alma Clean Power

Accelerating the transition to a net-zero ocean space

Alma provides clean power systems based on **solid oxide fuel cells**

✓ Fuel flexible

- can run on Ammonia, Methanol, Ethanol, Hydrogen, LOHC and natural gas

✓ Highly efficient

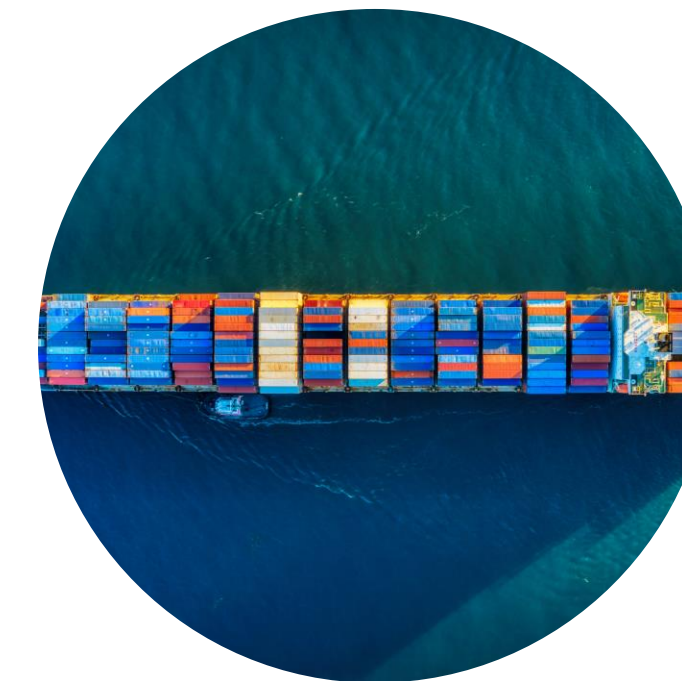

- more than 60% electrical efficiency + valuable heat

✓ Zero emissions

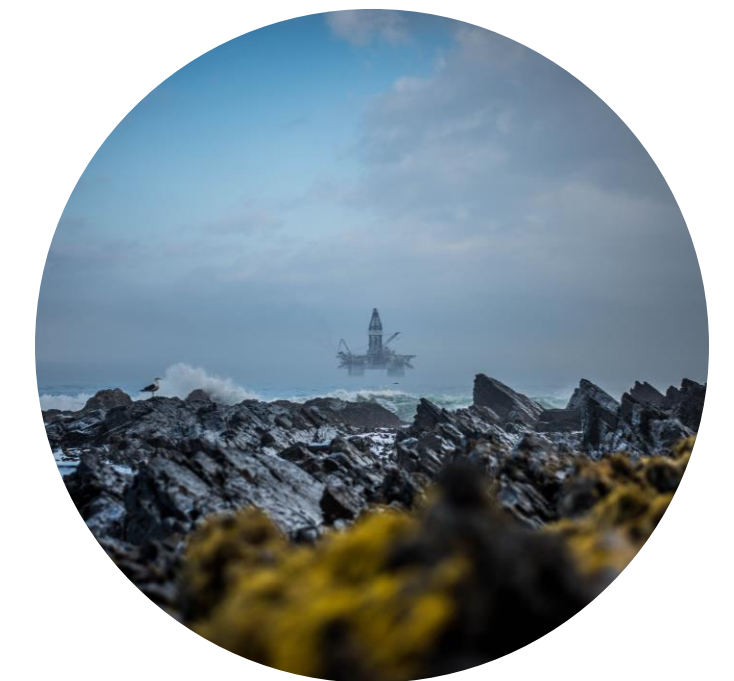

- depending on the fuel SOFC gives zero emissions or concentrated CO2 for storage

Maritime shipping

Offshore Oil & Gas

6+ ongoing projects

– including **world's first** ammonia fuel cell vessel
