

- Est. 2016 Headhunt agency in AI engineers for R&D
- Deep learning, ML, computer vision and data science
- Cool footprint: in 2016 we laid the roots to the (now: biggest) autonomous driving / HD map R&D unit Netherlands. Now it is our specialisation
- Also supply to: semiconductors, Imaging for medical, NLP, AI for call centres, Data engineers, High Frequency trading, and advanced data analytics

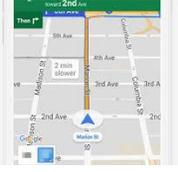

Autonomous Driving = it's a chain

Connected cars & mechanics

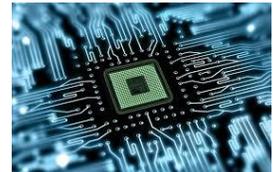

sensors

Maps and road info

cameras

Powerful Chips

Telco bandwidth

Telco stations

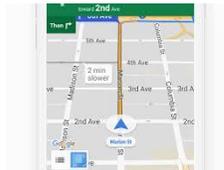

AI logic

Expertise areas

Mechanics:

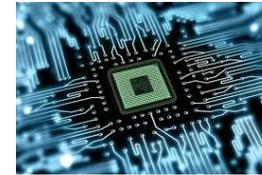

- like: brake, steering

Data science

Electronic engineering

Computer science

Telco and data engineers

R&D units AI logic /Deep learning labs

- Computer science
- Mathematics and algebra
- Physics ...very large datasets

New specialised areas like:

- (Graphic) simulation, ..almost like gaming scenarios
- Cybersecurity
- Semicon/neuromorphics, innovative materials
- Specialised testers

Autonomous Driving hotspots of expertise
