State-of-the-art machinery  
Prompt and perfect service  
Delivery and assembly at any location in Europe

ANTARE

# Environmentally friendly printing materials

We are gradually introducing eco-friendly materials to our base of available materials. Given the know-how and experience of our team we stay consciously attuned to the surrounding environment. The location of our shop in Milanówek, a garden-city suburb of Warsaw, is obliging.

The eco-friendly materials we use include:

- plywood
- honey-comb cardboard
- DISPA paper board
- double-sided laminated KATZ Display board
- textile materials.

# Trade Fairs

What makes us special in the advertising business is the comprehensive end-to-end service we offer to our customers. It starts with preparation of source files and ends with dispatch and sometimes assembly of the final product.

Among our customers are chains of clothing stores and hypermarkets, banking institutions, property developers, museums, theaters, and major advertising agencies in Poland and in Europe.

Participation in trade events is of immense importance to us. It is where we learn about new technologies and materials, and where we find new inspirations.

# Protection products series

## New needs inspire new solutions.

When pandemic broke out in the beginning of March of this year, we decided to capitalize on the potential of our machinery, expertise in material selection and technology, and the skills of our workers. We started manufacturing personal protective equipment, especially for face protection, i.e. face shields.

### We now have on offer:

- face protectors
- textile masks
- standing screens
- hanging screens
- hygiene stations
