

Under the High Patronage of
Mr François Hollande
President of the French Republic

In 2014, Toulouse will host The International Exhibition of Innovation and Competitiveness

16-18 September 2014

Innovation Connecting Show

The major players in open, cross and generic innovation will meet at
the Toulouse *Parc des Expositions*

> In partnership with the actors of ecosystems such as competitiveness clusters, ICS aims to speed up technology transfers between industrial sectors.

> ICS, an unprecedented business development platform at the heart of the major challenges of innovation.

This International meeting will bring together:

- 500 exhibitors who are innovation actors from the public and private sectors
- 4000 speakers expected for about one hundred events (round tables, symposiums and exhibitors' workshops) led by leading international experts, on the major global issues of tomorrow, including health, aging populations, hyper-urbanization, smart cities, the energy transition, the factory of the future, KETs, the Internet of the future and communicating objects.
- 20 000 professional attendants expected, including public, private, national and international investors, scientific players, industrial project managers, national, international and professional press, etc.

Competitiveness goal:

Cross-fertilization of innovations, business networking including financial and industrial actors

- Create and develop exchanges and partnerships between innovative project leaders and public and private investors
- Present and discover Key Enabling Technologies (KETs) and innovations
- Support and develop innovative companies
- Understand and anticipate the needs and expectations of tomorrow's markets
