

Operational Data Management

Empower your team with Datizy: the all-in-one solution for secure, efficient, and collaborative operational data handling.

Inefficient Workflows:

Do you spend a lot of time on manual and disorganized processes like paper documents and Excel? This results in lost productivity and delays in critical tasks.

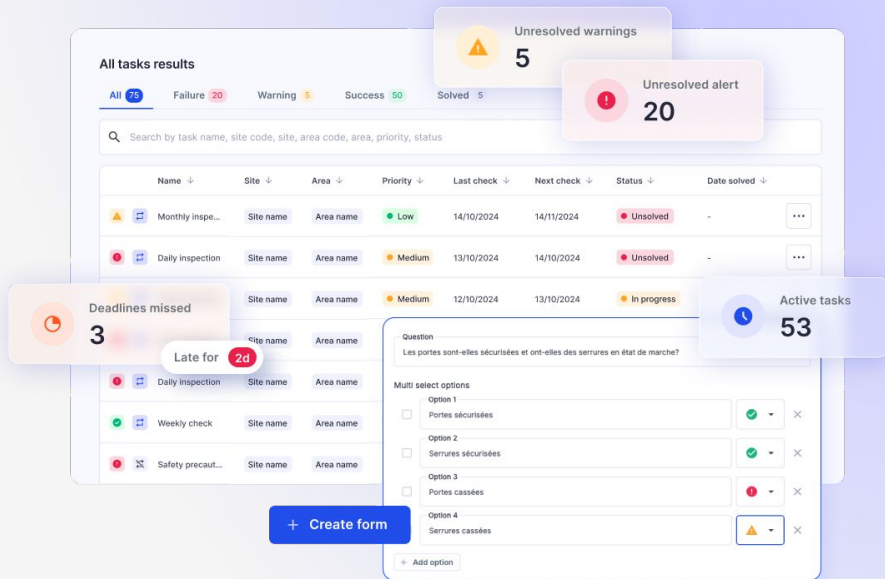

Lack of Real-Time Information:

Without a unified platform, it's difficult to get a complete view of your operations, optimize resources, and foresee problems to prevent downtime or inefficiencies.

Security & Compliance:

Are you struggling to ensure proper data handling and compliance with inspection and security requirements? This increases the risk of regulatory issues and dissatisfaction among partners and auditors.

The screenshot displays the Datizy dashboard with the following elements:

- All tasks results:** A summary bar showing 76 All tasks, 20 Failure, 5 Warning, 50 Success, and 5 Solved.
- Unresolved warnings:** A badge showing 5 warnings.
- Unresolved alert:** A badge showing 20 alerts.
- Deadlines missed:** A badge showing 3 missed deadlines.
- Late for:** A badge showing 24 late tasks.
- Active tasks:** A badge showing 53 active tasks.
- Table:** A table with columns: Name, Site, Area, Priority, Last check, Next check, Status, and Date solved. It lists tasks like 'Monthly inspection', 'Daily inspection', and 'Weekly check'.
- Form creation:** A section titled '+ Create form' with a 'Multi select options' dropdown menu.
