1 Filigran

What We Do

Filigran, founded in October 2022, stands out in the cybertech ecosystem for its commitment to revolutionising threat intelligence and its use within cybersecurity teams. Its mission is to develop innovative open source solutions, designed specifically to address the complex challenges organisations face in anticipating cyber risks and threats. Filigran solutions are used by over 4,500 public and private organisations worldwide. In June 2023, the company raised €5 million in seed funding, followed six months later by another round of €15 million in Series A funding.

Product Highlight

Filigran offers a cybersecurity suite called "Filigran eXtended Threat Management (XTM)", which helps organisations understand threat environments, anticipate and detect incidents, and conduct attack simulations. The suite currently consists of two solutions:

- OpenCTI: helps organise, store, and operationalize cyber threat intelligence information at both technical and strategic levels;
- OpenBAS: uses cyber threat intelligence knowledge to transform them into attack simulations, stress tests, and crisis management exercises.

2 Sekoia.io

What We Do

Sekoia.io is a European cybersecurity technology company, expert in intelligence-based eXtended Detection and Response solutions. Our Sekoia SOC platform provides a unified view and full control of the perimeter to be defended. Our mission is to empower security operations teams with a flexible and easy-to-use platform. We protect private companies, governments, and Tier One MSSP partners worldwide.

Product Highlight

- Sekoia Defend (Next-Gen SIEM) is an eXtended Detection and Response (XDR) platform available in SaaS mode and powered by exclusive cyber threat intelligence. Anticipation of attacks, automation, numerous integrations and verified detection rules simplify the protection of hybrid environments.
- Sekoia Intelligence (CTI) provides in-depth knowledge of cyberthreats. The normalization of intelligence flows facilitates the understanding of attacks, intrusions, and malicious activities. The exclusive intelligence produced is contextualized and actionable, benefiting strategic and operational teams.

3 Hackuity

What We Do

Hackuity provides a risk-based vulnerability management platform that helps organisations efficiently identify, prioritise, and remediate security vulnerabilities. By consolidating and analysing data from various security tools, Hackuity provides a clear, actionable view of risks, enabling teams to focus on the most critical issues. The platform's smart automation, continuous monitoring, and risk-scoring capabilities empower businesses to improve their cybersecurity posture, reduce exposure, and meet compliance requirements. With a customer-centric approach, Hackuity supports organisations in managing vulnerabilities proactively, ultimately safeguarding their assets against evolving threats.

Product Highlight

Our Hackuity platform automates Vulnerability Management (VM) to cut through the noise and remediate critical threats, empowering your Vulnerability Operations Center (VOC) to patch what matters – faster. Available via cloud, hybrid, and on-prem deployment, the Hackuity platform centralizes and harmonises vulnerabilities, deduplicates data from 80+ scanners and tools, reduces CVSS noise by 99%, automates 70% of VM operations, and reduces Mean Time to Remediate (MTTR) by 3x. SOC 2 Type II certified and IMDA accredited, Hackuity delivers a unified view of vulnerabilities, threat intelligence with MITRE ATT&CK, and cyber exposure, serving organisations worldwide across various sectors.

4 Gatewatcher

What We Do

Leader in the detection of cyber threats, Gatewatcher has been protecting the critical networks of worldwide large companies and public institutions since 2015. Our Network Detection and Response (NDR) and Cyber Threats Intelligence (CTI) solutions, quickly detect and respond to any cyber-attacks. Thanks to AI converging with dynamic analysis techniques, Gatewatcher delivers a real-time 360-degree view of threats, covering both cloud and on-premise infrastructures.

Product Highlight

Gatewatcher's NDR enables you to identify and characterise threats as quickly as possible, so you can take global remediation action and minimise disruption to your business from cyberattacks. Illustrated within a unique multiengine detection and response platform, benefit from 360° visibility through immediate mapping of all types of assets and users on your IT Systems. Thanks to our COCKPIT and REFLEX modules, you can speed up your SOC analysis, centralise handling of security incidents with full support for multiple business units and flexible role-based access control.

5 Tehtris

What We Do

TEHTRIS protects you against known and unknown threats in real-time, without human action.

- A technology powered by our own artificial intelligence, CYBERIA
- An XDR AI PLATFORM covering every protection needs in a single platform: Endpoint Protection (EPDR), Security Information and Event Management (SIEM), Mobile devices protection (MTD), Network Analysis (NTA), Deceptive Response (DR)...
- Hyperautomation: our SOAR automates your reactions to threats.
- Easy and secured deployment.
- CyberSphere MDR, a complete service to expand your cybersecurity.
- CyberSphere Configurations for the optimisation of your detection capabilities.
- A continuous R&D improvement for over 20 years to constantly be at the cutting-edge of cyberprotection.

Product Highlight

Unify your cybersecurity by bringing together all your solutions in a single console for high-speed detections and responses. Within the TEHTRIS XDR AI PLATFORM, you will find an EDR, MTD, SIEM, Honeybots, NTA and our DNS Firewall.

- GDPR compliant and not subjected to extraterritorial laws
- 100% developed and hosted in Europe
- Automated neutralisation of attacks
- Full visibility of your infrastructure: a single platform with a 360° view
- No access to your protected files
- Interoperable with your existing cybersecurity solutions

6 Secure-IC

What We Do

With presence and customers across 5 continents, Secure-IC is the rising leader and only global provider of end-to-end cybersecurity solutions for embedded systems and connected objects. Secure-IC provides patented cutting-edge protection technologies to the electronic industries. Secure-IC's integrated Secure Elements are embedded into hundreds of millions of electronic chips for smartphones, computers, automobiles, smart meters, cloud servers and more.

Product Highlight

Secure-IC offers embedded security IP solutions designed to protect sensitive data, prevent unauthorized access, and ensure the integrity of your systems. We provide a wide range of IP solutions that are optimised for easy integration into embedded systems. All our IP solutions are designed to provide the highest levels of security while minimising the impact on system performance and power consumption.

Pôle d'excellence cyber

This Pavilion is organized by the French Chamber of Commerce in Singapore – Team France Export, in partnership with Pôle d'excellence cyber:

What We Do

The Pôle d'excellence cyber is an association under the French law of 1901, created in 2014 under the aegis of the Ministry of the Armed Forces and the Brittany Region. The Cyber Cluster of Excellence also includes the following active members: French universities and Grandes Ecoles specialising in cybersecurity, the main cyber research laboratories of the CNRS and INRIA, major groups and innovative SMEs, often spinning off from research laboratories.

Product Highlight

Its aim is to develop the cybersecurity ecosystem based on the region's strengths in terms of training, research and innovative companies in the sector, as well as the concentration in Brittany of a significant proportion of the resources dedicated to cyber subjects by the Ministry of the Armed Forces, now joined by ANSSI and certain services of the Ministry of the Interior. From this regional base, our ambitions extend to the national level, with the aim of pursuing the development of a sovereign sector in line with the cluster's fundamentals.

Charles Thooris | *Representative of the Pôle d'excellence cyber in Singapore*

Established in 1979, the French Chamber of Commerce in Singapore belongs to a worldwide network of 118 French Chambers (CCIFI) in 93 countries with over 35,000 companies. One of the most active Chambers in Asia, the French Chamber is a self-financed and non-profit association that promotes mutually beneficial trade relations between Singapore & France.

OUR VISION

Is to be the most vibrant business network and trustful partner for business development in Singapore and in the region, offering a comprehensive platform of competitive, efficient and customised services.

OUR MISSION

Consists of connecting, promoting, bringing together a strong business network of companies and boosting their development in Singapore and in the region.

KEY FIGURES

A dynamic business platform of over 650 companies (Large, SME, Start-ups and individuals)

More than 220 events per year

A total network of 7,000 contacts in Singapore

Our strength in the local and regional ecosystem since 1979
