

INVITATION

How to (re)build the Europe of the Atom ?

The role of Gen-IV Advanced Modular Reactors
in Achieving Energy Sustainability and Independence

21.06.2024

09:00 - 10:30

Hotel Radisson Blu Carlton, Bratislava

Closing of the fuel cycle involving the reuse/ recycling of spent nuclear fuel has been the goal of nuclear engineers since the dawn of the nuclear industry and it is an indispensable part of its future.

Generation IV fast reactors offer a pathway to achieve this goal, providing a sustainable and long-term solution for Europe's energy needs in line with EU taxonomy.

This event will examine the potential of advanced modular reactors to transform the energy landscape and offer competitive advantages for Slovak industries.

Program:

8:30 - Registration with refreshments (business breakfast)

9:00 to 10:30 - Short introduction by Newcleo, panel discussion, Q&A session

Panelists:

- Stefano BUONO, Chairman of Board and CEO, Newcleo
- Vladimír SLUGŇ, President, Slovak Nuclear Society
- tbc

Moderated by: Samuel KOVÁČIK, Vedátor
