

LIST OF THE FRENCH DELEGATION

V. 19.02.2024

<p>www.airbus.com/en/products-services/helicopters</p> 	<p>AIRBUS HELICOPTERS provides solutions through a range of helicopters for law enforcement, firefighting, other natural disasters relief and military, complete solutions incl. training and support services. For this tour the focus will be on presenting: Range of law enforcement helicopters, mainly H145 in the advanced police mission configuration: H215, H225 for the firefighting and natural disaster relief H225M for the troop and cargo transport H145M as a light combat helicopter</p>
<p>www.armoric-holding.com</p> 	<p>ARMORIC HOLDING GROUP is specialized in metal processing with high value added. The Group is organized in 5 divisions : Industrial bodywork - Metal work - Automotive - Fire & Fighting and Engineering. We will focus on ESSONNE SECURITE and SIDES. ESSONNE SECURITE is an Armoring manufacturer and the European leader on sensitive material transport. SIDES is a firefighting trucks manufacturer. We have trucks for Airports, Industrial Plants and Civil Defense applications. We provide spare parts, training, refurbishment and full maintenance.</p>
<p>www.bertin-technologies.com</p> 	<p>BERTIN TECHNOLOGIES Bertin Instruments, a brand of Bertin Technologies group, designs and manufactures state-of-the-art measurement & sampling systems and instruments for key worldwide markets: • Nuclear Instrumentation, • CBRN threat detection. Our instruments and on-demand technologies allow our customers to measure, sample and detect invisible elements (gases, ionizing radiation, night-concealed targets,...). Our customized approach is based on a product-specific and customer-focused organization to meet their advanced needs.</p>
<p>www.chapsvision.com</p> 	<p>CHAPSVISION is specialised in sovereign data processing, ChapsVision enables businesses and public authorities to succeed in their digital transformation and create value thanks to a software suite built around its system for exploiting massive, heterogeneous data. The ChapsVision intelligent platform aggregates a set of interconnected solutions capable of feeding customer engagement in real time. It is highly compatible with your information system.</p>
<p>www.cif.fr/en</p> 	<p>CIF offers equipment and products for prototypes and micro series of electronic boards. CIF is a designer, manufacturer, and distributor of electronic board manufacturing equipment. Since its creation in 1979, CIF provides a complete range of products to build electronic boards from A to Z.</p>
<p>www.crimesciencetechnology.com</p> 	<p>CRIME SCIENCE TECHNOLOGY Founded by a team of fiduciary and forensic experts, C.S.T develops and markets security features for identity documents and banknotes. In addition, C.S.T designs innovative processes that reveal traces and clues allowing the identification of criminals. CST offer dual expertise: Forensic / Lumicyano and Fiduciary Documents.</p>
<p>www.groupepci.com</p> 	<p>DCI is the state-owned company acting as the operator of the French Ministry for the Armed Forces, DCI transfers the know-how of the French armed forces and Defense Acquisition Agency (DGA) to international partners. From program design to execution, DCI proposes a comprehensive and complete range of services adapted to foreign government requirement and specificities either in aerial, ground and in forces training.</p>

www.delair.aero

DELAIR is the world's leading **drone manufacturer**, offering high-performance fixed-wing UAVs worldwide since 2011, for **border surveillance, reconnaissance, intelligence** and **special operations forces**. The drones are designed for continuous use in **all seasons**, are **robust** and **easily repairable**, with quality and industrial **sensors**.

Delair specialises in commercial drones for industry, defence and mapping, with **numerous references** in each of these sectors.

www.gicat.com

Founded in 1978, the **GICAT** belongs, along with the GIFAS and the GICAN, to the CIDEF (French Defense Industry Council). The French land and airland defense and security industry association (GICAT) is a trade association created in 1978 and which today represents more than 380 members (large groups, medium-sized companies, and small and medium-sized enterprises).

www.idemia.com

IDEMIA, Public Security's Justice and Public Safety business line applies over 50 years of biometric expertise to empower global law enforcement agencies. With a dedicated team of almost 600 experts, we develop cutting-edge technologies—facial recognition, fingerprint matching, and investigative analytics—tailored for the unique needs of law enforcement agencies worldwide. Trusted by 85+ public customers, our solutions handle millions of records, and foster efficient policing with tools like livescan and mobile fingerprint devices. Prioritizing fairness and accuracy, we collaborate closely with customers to create a safer, more secure world. IDEMIA: your partner in preventing offenses, solving crimes, and protecting communities.

www.facepoint.com

FACEPOINT was originally created in response to the overwhelming tasks at hand for regulated entities to counteract the risk of money laundering, terrorism financing, corruption, and other financial crimes. FACEPOINT offers an alternative to name screening that consists of pictures intelligence. FACEPOINT's proposition quickly developed in other vertical markets as it became clear that its picture intelligence and risk screening model were of interest to government institutions and the law enforcement community for the early identification of emerging threats, and optimum operational efficiency in crime prevention and investigation.

www.intersec.com

INTERSEC Intersec is the European leader in telecom metadata and location intelligence solutions. Designed by fast data experts, our solutions guide governments in their data-driven revolution to build tangible value out of telecom metadata, from efficiently warning people in case of danger to mobile tracking and investigations solution for law enforcement entities. GeoSafe by Intersec is a rich portfolio of public safety and mission-critical ready-made solutions, including: Early & Public warning system (EWS/PWS) and situational awareness, Emergency call location and routing, Location investigations for LEAs.

www.komanche.fr

KOMANCHE Komanche has established a "value chain" bringing together 100% French technologies, where each of its solutions relies solely on French Manufacturers or Publishers. This value chain is developed under the "KSafe" by Komanche label. KSafe can interface with all market solutions, deploying a disruptive VideoProtection solution and one of the safest in terms of cyber-security. AES 256 encrypted VMS, D.A.I (VisioMind), ANPR, Security Hypervision (VisioGraph), Predictive Hypervision, etc.

www.neuronalytix.ai

www.neurocop.ai

NEURONALYS is an expert in the field of artificial intelligence and develops software solutions to meet needs not covered by conventional technologies. The company develops solutions such as NeuroCo for automatic detection and recognition of vehicles, pedestrians and other objects or faults, using cameras in urban, industrial or commercial areas. NeuroCop can also quickly analyse and search all recordings from a fleet of cameras in less than a second.

www.oppscience.com

OPPSCIENCE is a major platform editor in the field of Big Data and Artificial Intelligence. It creates solutions to transform scattered information into relevant knowledge, accessible to users from a single-entry point in a few simple and intuitive steps. Equipped with a set of state-of-the-art technologies capable of processing the knowledge extracted from the analysis of Big Data. SPECTRA, maximizes operational efficiency in investigations and intelligence-gathering. It integrates pioneering IAM (Intelligence Analysis Management) technology within functions and an UI tailor-made for Law Enforcement agencies.

www.rfence.fr

RFENCE is a French company specialized in designing security software solutions for surveillance and analysis of the radio frequency spectrum. Threats related to the radiofrequency environment are on the rise, whether they are linked to physical intrusions, drones, jamming, or even data theft. Critical sites require intuitive and effective solutions to defend themselves. RFence provides security software to assist you in detecting, locating, and analyzing all radiofrequency-emitting devices for more effective countermeasures. Our security solutions are built upon the utilization of advanced military technologies and cutting-edge algorithms, enabling comprehensive monitoring of all sensitive radiofrequency spectrum bands.

www.safran-group.com

SAFRAN Electronics & Defense holds leadership positions in optronics, avionics, electronics, and critical software for both civil and military markets: No. 1 company in Europe and No. 3 worldwide for inertial navigation systems (INS), No. 1 worldwide in helicopter flight controls and the European leader in optronics and tactical UAS. Safran Electronics & Defense and its subsidiaries employ 10 500 people. Safran has equipped Forces worldwide with more than 150 UAVs. They have been extensively deployed on military operations overseas.

www.streamwide.com

STREAMWIDE is a leading communications software technology provider delivering mission critical communications and operations solutions. Their products range from real-time voice and data solutions to geolocation services and digital transformation of operational processes. Their mission is to provide organizations and individuals with innovative, secure, and sovereign software solutions to support them in their digital transformation journey. To develop technology that serves humans in their everyday work while promoting effective team coordination.

www.thalesgroup.com

THALES As the European leader in cybersecurity and the World leader in data protection, Thales works alongside organizations to help them meet their cyber security needs, regardless of their field of activity, the level of confidentiality of their data or any country specific regulatory requirements, and to deliver cybersecurity that brings value to their core business and enables them to capture digital dividends. Thales counts over 40 years of cybersecurity expertise. We excel in supplying air, land, naval and joint forces with an unrivalled depth of capability in the following five areas:

- Communications, command and control systems
- Mission services and support
- Protection and mission / combat systems
- Surveillance, detection and intelligence systems
- Training & Simulation
