TRACK #1

Smart, Sustainable and Resilient Cities

Smart urban planning, resilient infrastructure, resource and transit management, community centered design, urban supply chains and innovative living solutions which will define the livability, health, quality of life, security, economic prosperity, environmental well-being and resilience of ASEAN cities in a post pandemic world.

We will discuss how to make cities more resilient to crises, what can be learned from the COVID management for climate change adaptation; what will cities offer in a new normal work play living environment; take from forward thinking examples of shorter and relocalized supply cycles, socially inclusive communities, human centric and holistic planning, revised usage of infrastructure and rethink urban systems towards self sufficiency.

TRACK #2

Sustainable Lifestyles - Fashion & Beauty

Textile, beauty and supply chain sustainable innovations which are decarbonizing and reducing the environmental footprint of their value chain while improving the welfare and wealth of people and communities they employ and serve. We will look at how the sustainability agenda works in pair with the pandemic recovery plans and how cross collaborations in advanced sustainability can bring greater business resilience.

TRACK #3

Food of the Future

Innovation to move forward healthy food, sustainable supply chain and viable agriculture which are securing safer products for consumers, better revenue and environment for farmers communities and growing income for companies.

CEO/Executive Panel

Speakers within the CEO panel are participating by invitation only and will consist of 3 to 4 CEOs from regional and global companies who have implemented sustainability transversely through their business organization, infrastructure, operations and supply chain.
