

FTCC: From Prompt to Innovation – AI Mastery

Date & Time: 02nd December 2025, from 09h00 to 12h00

Location: Alliance Française Bangkok

Training Overview

This comprehensive program is divided into two sessions, allowing you to build a solid foundation and then advance to expert-level techniques. You can register for one session or both for a complete learning journey.

Session: AI Mastery

Designed for those with a foundation in AI, this advanced training dives into sophisticated techniques for optimizing AI performance through three chapters and four hands-on exercises.

Advanced Techniques Covered

- MedPrompt: Enhance the performance of generalist foundation models.
- Reverse Prompting: Work backward from a desired outcome.
- Prompt Chaining: Create a series of prompts for complex, precise outputs.
- Tree-of-Thought: Support multiple parallel thought processes for deeper analysis.
- Strategic Integration: Enhance AI integration into critical business workflows.

What You'll Gain

MedPrompt, Reverse Prompting, & Variables

- MedPrompt: Enhance the performance of generalist foundation models without specialized training or expert-curated content.
- Reverse Prompting: Learn to work backward from the desired outcome to craft effective prompts.
- Variables: Use variables to make your prompts generic and adaptable to more use cases.
- Practice: Solidify your skills with guided exercises.

Corporate Implementation Strategies

- The 6 Pillars of Modern AI: Understand the critical factors for successful AI integration in your organization.

Prompt Chaining & Tree-of-Thought

- Prompt Chaining: Master the art of creating a series of prompts to guide AI in generating precise, high-quality outputs.
- Tree-of-Thought: Explore how Generative AI can support multiple thought processes for deeper analysis and decision-making.
- Practice: Apply these techniques in real-world scenarios to refine your expertise.

Why Attend Both Sessions?

Together, these complementary modules offer a unique combination of foundational theory and advanced practice. You will leave with actionable skills and strategic insights to unlock the full potential of AI for your business.

Who Should Attend

- Professionals and organizations looking to integrate AI into their activities.
- Anyone wanting to enhance their AI skills and anticipate future business evolution.
- AI Fundamentals: Beginners seeking a solid, practical foundation.
- AI Mastery: Individuals with basic AI knowledge looking for advanced mastery.

Training Outcomes

- Practical skills to boost productivity and drive innovation.
- Strategic insights for successful AI implementation.
- Advanced techniques for optimizing AI performance.
- Confidence to apply AI solutions in real-world scenarios.
