

Virtual Webinar

Securing and Protecting Personal Information

Never before has our world been more virtual . . . from how we work and conduct meetings, to how we bank, shop and socialize. Unfortunately, identity theft is the fastest growing online crime in the United States occurring at a rate of once every 79 seconds. The Federal Trade Commission reports that identity theft alone, accounted for over 42 percent of all frauds reported to federal authorities.

Hackers don't need to know how much is in your bank account to want to get into it. Your identity, your financial data, what's in your email . . . it's all valuable. And cyber criminals will cast as wide a net as possible to get to anyone they can. They're counting on you thinking you're not a target.

That's why you need to be more vigilant than ever about protecting our identity.

The Minnesota Market invites you, your family and friends to attend our free virtual webinar and learn from cybersecurity experts as they present best practices to avoid cyber-attacks.

Please RSVP by clicking on the Registration Link.
Contact your Financial Advisor with any questions.

This event is educational in nature - no company specific products will be discussed.

IMPORTANT PARTICIPANT INFORMATION. The webinar you will be registering for will be hosted by WFA or an affiliate, but will be delivered on a third-party platform and may include invited non-affiliated guest speakers. Other participants will be able to see your name or image if you provide it when signing into the event. Please review the applicable privacy and security policies and terms & conditions for the webinar you are attending. If you have any questions or concerns please contact the sender of this invitation.
